Grow With The Best

GUTTER CONNECT

Recognized for its simplicity of design, this gutter connect poly greenhouse has become an industry favourite unsurpassed for versatility, reliability and cost effectiveness.

Built to exact standards, this engineered greenhouse provides years of quality service, and its versatility can be used for growing or becoming a retail environment.

Designed for quick, easy construction, The 'Herculon' Gutter Connect greenhouse provides an excellent long term investment.

Sizes

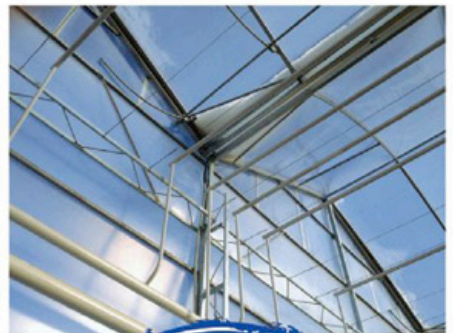

- 18 ft, 21 ft, 24 ft and 27 ft widths
- Twin 18 ft, 21 ft and 24 ft widths

Standard Post & Arch Spacing:

- 12 ft post spacing at various heights
- 4 ft and 6 ft arch spacing

Features

- Designed for quick, easy construction
- Hot dipped galvanized 3" square posts
- galvanization after manufacturing is completed
- Hot dipped galvanized trusses
- Gable ends have inverted trusses and 3" centre posts for strength, rigidity and for crop support
- Maximum light transmission due to 1" x 2" or 1" x 3" arches
- Pre-designed for heating and shading systems

Rimol Greenhouses

We stock Rimol Greenhouses. No waiting, no special order cost, or extra shipping cost.

- **Need a custom sizes or certain specification? Please give us a call!**
- **We also handle other brands of greenhouses; call for a quote.**
- **Cold Frames**
- **High Tunnels**
- **Hoop Houses**
- **Gutter Connect**
- **Shade Structures**
- **Guaranteed 5 years against failure!**

Many add-on options including; Ridge vents, roll-up sides, extended ground posts, & end wall kits. All Prices are 4' bow spacing (5' is available) and include frame only. Plastic, fans, shutters, heater and end walls must be purchased separately. Freight charges will be added on top of your quoted Price. (FOB NH) Greenhouses shorter than 40' add 20% to the below Prices. Note: Prices are per square foot.

NOR'EASTER & NORTHPOINT RIMOL GREENHOUSES

Perfect for high tunnels and growing

Features

- Nor'Easter available in 30 ft. and 34 ft. widths
- Northpoint available in 22 ft. and 26 ft. widths
- 4 ft. bow spacing standard
- Nor'Easter bows are 1.90 in., 13 ga. galvanized steel tubing
- Northpoint bows are 1.66 in., 14 ga. galvanized steel tubing
- There is a truss assembly with every bow resulting in unmatched strength
- 5 purlins per 30 ft. greenhouse and 7 purlins per 34 ft. greenhouse
- 3 purlins for the 22 ft. and 26 ft. greenhouse
- Purlins connect to the bows using a cross connector system which prevents unnecessary drilling into the bow
- Truss support system allows for additional purlin pipe to be hung for hanging baskets or crop supports
- Wind bracing kits included with all greenhouses
- The height of the greenhouse can be raised with the extended ground posts option for high tunnels
- Additional purlin pipe is available for hanging basket runs or crop supports
- Engineering meets International Building Code (IBC)

Eastpoint Series • 18'-20' Greenhouse

The Eastpoint Series is the best of both worlds, combining strength and versatility at an affordable Price, making it a great starter greenhouse. The Eastpoint is perfect for growers that want the durability of a larger free-standing house but are looking for something simple and easy to construct. Roll-up sides are an optional upgrade.

ITEM #	DESCRIPTION	
18' Wide Eastpoint Series	32' Plastic Width	Call for Price
20' Wide Eastpoint Series	32' Plastic Width	Call for Price

Northpoint • 22'-26' Greenhouse

The Northpoint Series is the ultimate in freestanding greenhouses. The Northpoint was developed as one of the original Rimol Greenhouses, designed for multi-functional use as both a growing and retail house. The Northpoint has exceptional versatility, and can also withstand harsh snow and wind loads seen in all areas of the country. Roll-up sides are an optional upgrade.

ITEM #	DESCRIPTION	
22' Wide Northpoint Series	32' Plastic Width	Call for Price
26' Wide Northpoint Series	40' Plastic Width	Call for Price

Nor'Easter Series • 30'-34' Greenhouse

The Nor'Easter greenhouse series is the strongest free-standing greenhouse available. The Northeast United States is known for experiencing harsh and unpredictable weather conditions, and as the name suggests, the Nor'Easter greenhouse series will protect your crops through some of the most dangerous weather. The Nor'Easter can be counted on to be dependable when you need it most, and is constructed with a unique truss support system to double the strength of every bow. Rimol Greenhouses are built to last, and the rock-solid construction of the Nor'Easter greenhouse series will prove that.

Low Tunnels

Need a high tunnel but do not have the space or money to put one up? Consider a low tunnel that is 40" wide and 48" high. It has all the same benefits of growing in a high tunnel, but on a smaller scale. You pick your length and we can put a kit together for you. Comes with ground stakes, 1/2" galvanized hoops, 4-year 6 mil. plastic or a 1 year 2+mil. plastic and rubber cords w/hooks. With this unique low tunnel, if it is a warm day, you can go along and lift up the sides just like a high tunnel. Can also use row cover for frost protection or bird netting for pest protection. Consider adding an irrigation system to your low tunnel with overhead irrigation or use drip tape.

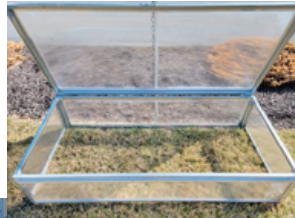

Hobby Greenhouse

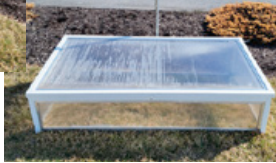

Our Hobby Greenhouses are built and available in the following specifications and options

- Solid polycarbonate walls and ceiling
- Solid wood flooring
- Installed storm door
- 20" Venting fan
- Thermostat available
- Wire benching
- Ships just like a storage shed
- EZ set, make a level spot and we can set it there
- Freight not included, call for shipping quote

METAZET

FormFlex

Hanging Basket System

Especially designed for hanging crops suspended above another crop as a second cultivation layer or hanging from the ceiling of the processing area, the Hanging Basket System of Metazet FormFlex is an excellent choice.

The Hanging Basket system can be fitted in nearly any existing or new greenhouse with options to be custom-made to suit your specific needs and preferences. This includes, for instance, the distance between plants, the number of loops in a greenhouse section, the track length and the working height of the harvesting track.

Metazet FormFlex will design the Hanging Basket System entirely based on your ideas and conditions. This system allows the user to hang, fertilize, pinch or inspect hanging baskets at ground level. You simply hang your baskets on each hanger at ground level and the chain in the track will take the baskets up to your truss brace height. Whenever you want to work with your baskets you drop the rail and start the motor and all the baskets will rotate on the track coming down from ceiling height and dropping to ground level for you to do what you wish with it. It can be set up for watering all of your hanging baskets as well.

Benefits and possibilities

Depending on the number of turns, only a single motor unit is needed to control more than 300 meter track. The track can be built in many different ways, with both inside and outside turns. The wear-resistant, durable track guides enclosing the chain make this a very safe and reliable system. Because it is possible to lower the track when it is working, all the work on this second cultivation layer can be done in one place. This leads to increased safety for people and crop as well as a considerable reduction in labor. Nearly all pot sizes can be hung in the Hanging Basket system, so that plants can be in different stages of development. It is of course possible to suspend the plants at several heights in the track using extension hooks. Our extensive control unit is easy to install and makes it possible to water the plants automatically. To save costs, this system has been designed in such a way that you can install it yourself.

Greenhouse Curtain Motor

Single output, low voltage, DC motor

The LVM60 Greenhouse Curtain Motor comes complete with the guide wheel set and has been specially designed to meet the demands of greenhouses. These compact and lightweight motors are able to take your ventilation to a more efficient operation.

You can automate your curtain ventilation by using one of our environmental controllers or use interface boxes to connect to your existing ventilation system.

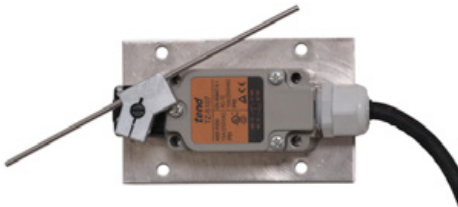

Features:

- 4 Year Limited Warranty
- Innovative low-bind guide wheels for longer motor life
- U.S. based tech support and repair options at 1-877-546-2257
- Innovative roll bar adapter system for multiple roll bar adapters
- Easy access limit switches (directional limits)
- Interchangeable guide wheel assembly to change left or right output
- Compact, quiet, and light weight

Motor Specifications: 24 VDC, 60 NM, 3A, 72 W, 2.7 RPM, 40 Rev, 0.78" (20mm) OD output shaft

****The LVM6v0 Greenhouse Curtain Motor is designed to lift up to a 1250 sq. ft. single bar curtain or up to a 625 sq. ft. double bar curtain****

ITEM #	DESCRIPTION	PRICE
GFA5LVM60	24V DC Roll Up Motor Operator w/Guide Wheels	\$296.99

Limit Switch

Required for all Roll Lock Curtain and Rack and Pinion installations.

Required to override motor's down Limit Switch when using Roll Lock. Compensates for poly shrinkage and/or expansion.

ITEM #	DESCRIPTION	PRICE
GFA5LVML	Limit Switch Assembly for Auto Roll Up	\$117.09

Automatic Vent Opener

Automatic Vent Opener

A farmers favorite, this opener is low maintenance because it is 100% heat powered. The auto opener operates automatically. Durable aluminum and stainless steel construction.

Adjustable opening temperature of 60° F to 75° F

Maximum opening of 18"

Recommended for vents up to 15 lbs.

Quick disconnect feature for cold frames

Equipped with dual springs for windy locations

ITEM #	DESCRIPTION	PRICE
AUTVE	Automatic Vent Opener	\$44.53

AegisTEC Greenhouse Controller

The AegisTEC Greenhouse Controller gives you the power to reliably automate your greenhouse. Get the peace of mind and energy savings of our integrated and easily expandable master controller system. Put your temperature, humidity, rain and wind control on autopilot so you can get back to doing what you do best. No more manual cranking or manual switch flipping. This curtain controller can automatically open and close your ventilation exactly the way you set it. Automating your greenhouse is the smart choice!

Our greenhouse controller provides all-in-one control and power to ventilation drive motors, sidewall & rack and pinion hinged vents. No need for an additional power box. Easy to program with excellent feedback from controller.

Features:

- Timed overrides for DIF growing technique and Light Deprivation
- Optional wind, rain, and humidity sensor overrides
- Independent manual override
- Cooling and heating outputs in harmony
- Easy to program set points

ITEM #	DESCRIPTION	PRICE
GFA5VC40	AegisTEC Touchscreen Controller	\$1,025.46

Greenhouse Humidity Sensor

Aspirated Greenhouse Humidity Sensor – Enables relative humidity control by implementing the ventilation, heating and cooling assets within the greenhouse. This sensor is for use with our environmental controllers.

ITEM #	DESCRIPTION	PRICE
GFA5VCSH	Humidity Sensor	\$384.55

Greenhouse Vent Controller

The VCU 2-24 Environmental Controller is a single zone, thermostatic controller for greenhouse heating and cooling. Featuring a user friendly LED interface, you can automate your greenhouse ventilation components. Perfect for high tunnels

Get your greenhouse automation up and running quickly with this reliable and easy to setup controller.

Included: 100' temperature sensor, power and control up to (2) of our LVM60 or LVM100 motors, and control either (2) fans or (2) heaters or (1) of each!

Features:

- Manual overrides
- Easy to program set points
 - o Open and Close
 - o Idle and Run time
- Supplies 24 VDC to up to (2) of our LVM60 or LVM100 motors
- Control of (2) dry contacts (one of the options below)
 - o (2) Heaters
 - o (2) Fans
 - o (1) heater and (1) fan

Bringing Hi-Tech Innovations to Horticulture

SunView Therm

- Benefits**
- Energy Savings
 - Minimized Condensation Issues
 - Constant Plant Canopy - Light Diffusion
 - 87% Light Transmission

- Features**
- Thermal
 - Light Diffusion
 - Anti-Condensation
 - Available in 6 mil
 - Superior Dart Impact Performance

Light Diffusion

Light diffusion increases photosynthetic efficiency by providing more homogeneous light from all directions. The film reduces shadows, helps minimize burning and ensures better distribution of light. Poly-Ag Corp specifically formulates its films for optimum performance related to crop response.

Thermicity & Condensation

Thermicity: During the day, the greenhouse structure, plants and soil heat up due to both visible and infrared light from the sun. In the evening it cools down and re-emits radiation within the IR range. Special properties are incorporated within the film which block IR radiation and help maintain a controlled temperature in the greenhouse, providing plant insulation and less cycling of heaters at night. We offer two Thermal films. One of which offers 30% Light diffusion. The second has an industry-leading 55% Light Diffusion! **Anti-condensation:** The properties modify the film surface; as a result water droplets are spread into a continuous water layer which subsequently runs down along the slope of the film. These films increase light transmission and reduce water drip.

SunView 4

- Benefits**
- Durable
 - Excellent Top Layer Performance
 - Superior Puncture Resistance
 - 90% Light Transmission

- Features**
- Made From Latest Resin Technologies
 - High Clarity
 - Available in 6 mil
 - Superior Dart Impact Performance

Light Quality

The total light transmission of the greenhouse covering is extremely important for Photosynthetically Active Radiation, 400—700 nanometers. The intensity of these wave lengths in the PAR range directly influences the growth and development of the plants. Poly-Ag Corp specifically formulates its films for optimum performance related to crop response.

Sunview 4

SunView 4 was developed to meet the growing needs of the growers in North America to produce quality crops. Our High-Technology greenhouse films are based on the latest developments and technologies in the manufacturing process. SunView 4 is designed to transmit more light while maintaining superior mechanical properties.

Ken-Bar Poly Convection Tubing

Ken-Bar's poly convection tubing is available in either 4 or 6 Mil weight. The polyethylene is clear and is protected with a strong ultraviolet inhibitor. The formulation of the plastic is designed for maximum light penetration and for durability in a greenhouse environment. There are several advantages to using Ken-Bar tubing:

Tubing Air Outlet Chart

Guarantee. Each tube is guaranteed to support the cubic feet/minute output of the fan. If there is a problem, the tubing will be replaced immediately. The 4-mil tubing is guaranteed for 1 year and the 6-mil for 3 years.

Custom Punching. Ken-Bar provides proper diameter holes and spacing that conform to fan manufacturer's specifications. A properly designed tube will make full use of the fan's output by distributing air evenly down the length of the greenhouse. We can custom design a tube based on your greenhouse length and fan diameter. Punch position can be varied as shown below to provide the best possible air flow for each situation.

Price per foot.

JET24	24" • 25.25" RO* • 4820 max dfm	\$450.03

JSW30 and JSW36 are slant wall shutter fans.

Shutter Fan

Shutter fans are ideal for greenhouse or building exhaust. These fans are quiet and can efficiently move large amounts of air. The 12", 16" and the 20" fans are 3 speed and the 24" is a 2 speed.

- Certain models available in 2 or 3-speed configuration
- Pre-wired with 9' 115V cord
- Aluminum shutters are reinforced with steel corner braces
- Guards have zinc plating under powder coating
- OSHA approved guard spacing

Inside

Aluminum Intake Shutters

Aluminum intake shutters or free air exhaust applications. Nylon bearings with solid shafts for a long life span. Interlocking blades for weather seal.

Features:

- Corrosion resistant heavy gauge aluminum frame.
- Precision counterbalanced aluminum blades open easier and wider to permit higher performance capacity.
- Corrosion proof nylon bearings throughout help prevent sticking.
- Suitable for dusty or humid applications.
- Stainless steel hinge pins will not rust and insure easy positive blade action.
- All shutter blades are reinforced with polished galvanized steel rods, and equipped with double tie-rods.
- WAAC models are center pivoted to open easier against
- house static pressures.

Thermocool 110V 122 CFM (inflation blower)

This light weight inflation blower is a very economic blower to inflate your greenhouse plastic. Installation is very easy, find the direction of air flow on the blower. Cut a X a little smaller than the blower housing in the plastic at your requested location. Pull the X tabs toward the inside of the greenhouse and apply several wraps of duct tape or electrical tape around the whole outside of the blower housing. you do not need any kind of bracket or mounting kit, since this light weight blower just hangs on the greenhouse plastic.

ITEM #	DESCRIPTION	PRICE
VBM122	Thermocool 110V, 122 CFM (inflation blower)	\$26.16

Thermostats

Every greenhouse environment needs climate control. A greenhouse to warm or cool can mean a great difference in the quality of plants or product produced. Use our thermostats to help control the climate of your greenhouse or building.

Hot Dawg Modine Heaters

Model Hot Dawg Features:

- Hush-puppy quiet operation.
- Uses natural or propane gas.
- Certified for residential, commercial and industrial use.
- Low-profile design and neutral color to blend in with decor.
- Install quickly and easily with field wiring connections and knockouts for quick access to gas and electricity.
- Standard power exhaust simplifies side-wall or roof venting with small-diameter vent pipe.
- Right or left hand controls available on all 30-75 units. Gas, electrical and flue connections can be changed by simply flipping the Hot Dawg over.
- Permanently-lubricated motor for trouble-free dependability.

Full 10-Year Warranty
On Heat Exchanger

Modine Propane Heaters - PTP Heater

Introducing the new power vented, PTP unit heater line with stainless steel bent tube heat exchanger standard. The PTP was specifically designed with the customer in mind to provide high value at a reasonable cost. Backed by Modine's nearly 100 years of pioneering HVAC innovation, the horizontal mounted PTP delivers reliable performance and longer life in a small-business-friendly package.

Model PTP features:

- Stainless steel heat exchanger comes STANDARD on all units, extending the life of your investment
- Totally enclosed, permanently lubricated fan motor outside the cabinet is standard for trouble-free dependability
- Constructed with Modine's proven tubular heat exchangers for a low-profile design on jobs with lower mounting heights
- Proudly Made in the USA
- 10-year heat exchanger warranty is STANDARD, providing you peace of mind
- Optional finger-proof fan guard for low mounting height applications
- Power exhauster and controls mounted inside the cabinet for protection from airborne moisture and dust
- Installs quickly and easily with knockouts and field gas and wiring connections inside a roomy controls section for quick and easy access

Effinity Propane Heaters

At 93% thermal efficiency for all model sizes, Modine's Effinity93 condensing unit heater features the highest efficiency available in North America for commercial and industrial gas-fired unit heaters. This industry leading efficiency is a result of the coupling of our Conservicore™ secondary heat exchanger technology with our robust tubular primary heat exchanger design. The Conservicore™ technology features a secondary recuperative heat exchanger fabricated from AL29-4C® stainless steel. This material is superior to other lower grades of stainless steel and aluminum, resulting in outstanding ability to withstand the corrosive environment of condensing gas fired equipment. **We are now stocking the Effinity heaters.**

Stoves & Boilers

Automatic Coal-fired Boiler Keystoker

This steam or hot water boiler will guarantee hot water year round. It can be easily converted from a coal stoker to an oil stove. This an economic and reliable heat source.

- Long life automatic heat without costly repairs.
- Low cost fuel is the key to heating economy.
- Entire unit factory assembled and fully tested.
- Available from 90,000 to 528,000 BTU Output.

These stoves are built to order. Many customizable features and options. **Please call for more information & estimated pricing.**

Warm Air Keystoker

The Keystoker furnaces are built to deliver maximum heat. At the lowest initial investment and lowest operational cost, a large silent air circulating blower will assure complete circulation of warm, filtered air throughout the entire area to be heated. The downdraft heat exchanger increases heating surface, permitting circulation of every thermal unit of heat into the warm air leader pipes for rapid distribution.

- No Moving Parts in the Fire Box.
- Long life automatic heat without costly repairs.
- Low cost fuel is the key to heating economy.
- Reliable. Heavy duty factory built gear box.
- Entire unit factory assembled and fully tested.
- Sealed ash pit assures clean dust-free operation
- Multi burning options; coal, wood, oil, etc.
- Available from 125,000 to 450,000 BTU Output.

These stoves are built to order. Many customizable features and options. **Please call for more information & estimated pricing.**

Black Woven Ground Cover

This is a UV stabilized black woven cloth that is extremely strong and superior to sheet plastic. 3.2oz with a stripe every 12". Call for quantity discounts.

7.5" High Humidity Dome

This is the only dome on the market with adjustable top and side vents to better control humidity and temperature. These domes fit directly onto the standard 10 x 20" cut kit trays to create a humid and warm environment ideal for cuttings and seed germination. Tall 7.5" dome gives extra height for your taller cuttings. Adjustable vents allow for perfect humidity and temperature control.

ITEM #	DESCRIPTION	PRICE
HD1020L	10" x 20" x 7.5 High	\$6.34

Clear 1020 Humidity Dome

A clear dome to place over flats to increase the humidity inside to create a germination chamber for higher germination rate of seeds

ITEM #	DESCRIPTION	PRICE
HD1020	50 qty/cs	\$3.48

HC Nursery Pots (thermoformed)

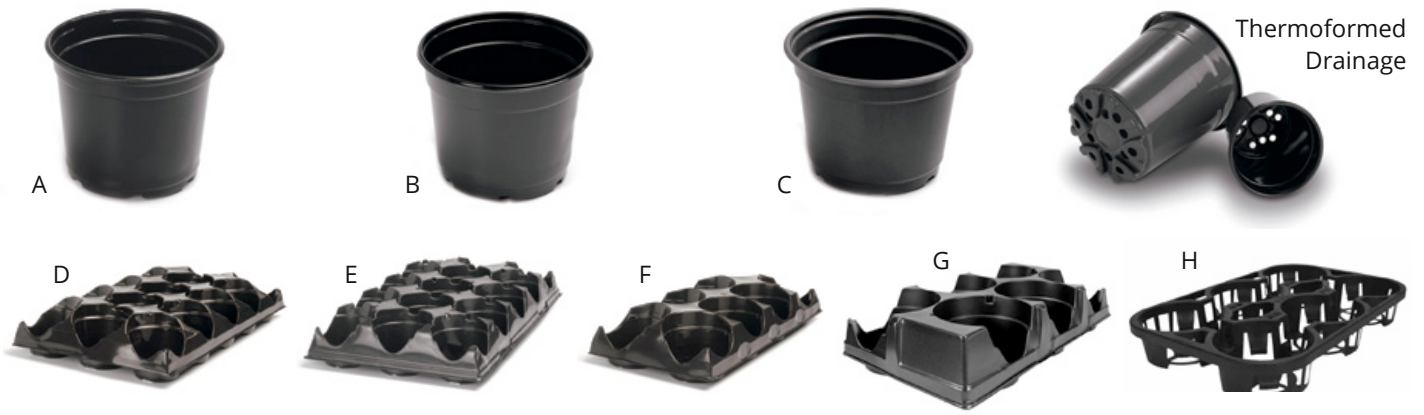

HC nursery pots come in two different styles. The injection molded or thermoformed pots. The injection molded pots are harder smooth wall pots, the thermoformed pots are thinner and flexible – also smooth wall.

Berger was the first peat producer in Canada to be ISO 9001 certified and is one of the first Veriflora certified peat producers.

- Consistent Quality products shipped in more than 15 countries.
- Highly trained sales team combining over 200 years of experience.
- Over 98% of Berger clients answered “yes” when asked whether they would recommend Berger Peat Moss to others!.
- Over 225 SME analysis are done weekly in the Berger lab.

BM6

General purpose for annuals, herbs, veggies with optimal drainage.

ITEM #	DESCRIPTION	PRICE	10+	30+
BM6	3.8 cu ft compressed	\$25.39	\$24.88	(30+) \$24.12
BM6-3	3 cu ft loose potting soil	\$14.15	\$13.87	(54+) \$13.44

BM4

Natural Fiber - Wood —
INCUBATED PH = 5.4 - 6.2

Contains an eco-friendly, sustainable wood-fiber component that mixes perfectly with peat.

- Offers high water retention combined with rapid air diffusion for very rapid root development.
- Stable and uniform for the most consistent crops.
- All organic and compostable with smaller environmental footprint than coir, perlite and vermiculite.

ITEM #	DESCRIPTION	PRICE	10+	30+
BM4	3.8 cu ft compressed	\$24.35	\$23.86	\$23.13

BMM

Berger Mum Mix — INCUBATED PH = 5.4 - 6.2

Made with our professional grade composted peat moss, this substrate increases the amount of available water.

- Contains additional nutrients and beneficial micro-organisms.
- Improved water retention and distribution in containers.
- Higher CEC for increased buffering capacity.
- Good for post-harvest environment (retailers & box stores).

ITEM #	DESCRIPTION	PRICE	10+	25+
BMM	3.8 cu ft compressed	\$26.94	\$26.40	\$25.59

BM2

Seed Germination — INCUBATED PH = 5.2 - 6.0

High-quality, general-purpose plug mix for unmatched uniformity during seed germination and seedling production. This fine-textured medium is designed for dry conditions or when additional moisture is required.

- Easy-to-use mix fills small cells perfectly for consistent growth.
- Balanced water-to-air ratio allows rapid root ball development.
- Vermiculite improves water distribution and management.
- High CEC reduces pH and EC variations.
- Flexible and forgiving substrate.
- Low fertilizer starter charge lets you control fertigation.

ITEM #	DESCRIPTION	PRICE	10+	30+
BM2	3.8 cu ft compressed	\$33.20	\$32.54	\$31.54
BM2-3	loose fill bag	\$16.73	\$16.40	(54+) \$15.89

BM5

Natural Fiber & Aggregate - Wood —
INCUBATED PH = 5.4 - 6.2

The combination of NF Wood and perlite offers a good balance between drainage and water retention. Easy transition from a peat/perlite mix. Includes all the benefits of the NF wood with the security of perlite.

- Highly versatile;
- Reduces chemical use and input costs;
- Unique soil structure designed for very rapid root development;
- Uniform and stable for even growth;
- Increased volume per bale in compressed formats.

ITEM #	DESCRIPTION	PRICE	10+	30+
BM5	3.8 cu ft compressed	\$24.97	\$24.47	\$23.72

Retail Peat Moss

Retail Peat Moss is an economical peat moss for mixing your own soil or blueberries, etc.

Coconut Coir

Coconut Coir is a 100% natural by-product of harvesting coconut. Coir consists of the coarse fibers extracted from the husk on the outer shell of a coconut. Because of its superior water holding capacity, excellent air space and drainage, coir is a useful soil amendment for potted plants, containers and gardens. Coir's neutral pH of 5.8–6.8 allows it to efficiently release nutrients to plant roots and reduces the need to use dolomite lime in the garden. Add water and soak your brick for at least 1 hour before using it. A fully-hydrated brick can hold eight to ten times its volume in water.

ITEM #	DESCRIPTION	PRICE	70+

Coconut Coir Grow Bags 5 Gal

Set these coir grow bags in place, add water to expand the coco coir media and plant. These grow bags are popular for tomatoes, cucumbers, berries and cannabis. Grow bags come complete and include coco coir block. Drainage holes are predrilled. Bags are available in 3 or 5 gallon size.

- Convenient • Pre-Washed • LOW EC • pH 5.6-6.5

ITEM #	DESCRIPTION	PRICE
COCCOGP5	Coconut Coir Grow Bags 5 Gal	\$3.88

Vacuum Seeder

- An economical, fast, and easy way of seeding seeds into trays
- Seed plates are made of aluminum and are very easy and quick to change via clamps
- Easy to use, Hook up a vacuum to hose, spread seeds over plate and seeds will be vacuumed to the micro holes in plate, flip seeder box to the side with the seed reservoir section down and excess seed will fall into seed reservoir section, then turn the over the seeder box upside down over the tray and close valve to cut vacuum and seeds drop into tray
- Multiple tray sizes available
- We stock the smallest size hole which is a 1.02MM hole. If you are using these for larger seed it would be beneficial to take a bigger drill bit and enlarge them.

Epsom Salt

Epsom Salt raises sugar content in fruits. Also used to green up plants. A good source of Magnesium sulfate.

ITEM #	DESCRIPTION	PRICE	10+
ES50	50 lb	\$22.05	\$21.39

Calcium Nitrate (greenhouse grade)

Calcium nitrate (PureCal) is a fully water soluble fertilizer, that is a highly efficient sources of available calcium and nitrogen for plants under all growth conditions. It is a highly pure, white, fine crystal that is easily dissolved in water.

Suited for application through all fertigation and foliar application systems – drip systems, low volume sprinklers, center pivots and spray units.

As calcium is not mobile in the plant, it has to be continuously supplied throughout the growth season to keep adequate levels in the plant tissues and to ensure proper development. The nitrate nitrogen is readily absorbed by the plant and improves the efficiency of calcium uptake.

Nutri-Leaf 20-20-20 (greenhouse)

A general purpose fertilizer used on vegetable crops in the growing stage. Suggested rate; 5-10 lb per acre. Can be used as a foliar spray or applied through drip irrigation tape.

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE
MIL325	Nutri-Leaf 20-20-20 (greenhouse)	25 LB	\$49.93

Nutri-Leaf 20-20-20

Generally used on vegetable crops in the growing stage. Often applied at the rate of 5 lbs per acre per week.

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE
MIL320	Nutri-Leaf 20-20-20	25 LB	\$45.41

Miller's 20-10-20

Generally used on greenhouse bedding plants. Suggested rate: Applied with a Hozon use 4 oz/gal or 10Tbsp/gal of water. Direct spray use 1/3 oz/gal or 2 tsp/gal water. Caution: water plants immediately after fertilizing to avoid burning.

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE
MIL201020	Miller's 20-10-20	25 LB	\$56.65

Established in 1922, Plant Marvel Laboratories pioneered and popularized the use of water soluble fertilizers. We introduced our original 12-31-14 General Purpose Hi Phosphate formulation over 90 years ago helping to fuel the growth of soil-less growing and hydroponics. Some years later we found a way to incorporate soluble forms of minor and trace elements into our expanding line of soluble N-P-K fertilizers. This became the first commercial fertilizer to deliver a total nutrient feed to crops without fear of burning and with unparalleled ease of application. It provided almost instant response because all nutrients were in a form the plants could utilize immediately. We called it Nutriculture.

Over the years, we helped pioneer the concept of foliar feeding and widespread use of water solubles in the commercial market. But our most important innovation has been the incorporation of all necessary trace elements into every N-P-K formula we manufacture. Today this practice is becoming standard with all fertilizer manufacturers.

INDUSTRY LEADERSHIP

We are proud of Plant Marvel's leadership in the horticultural industry. Our list of Firsts includes:

- First to produce a high-concentrate, economical water-soluble fertilizer.
- First to incorporate minor and trace minerals in significant quantities and in a soluble form that was readily available to plants.
- First to market a starter solution for faster development of new crops.
- First to promote various formulas specifically designed for the changing needs of crops at different stages of growth.
- First to develop fertilizers specifically to offset the effect of crops suffering from toxicity caused by excess mineral content in the water or soil.
- First to promote ratios to accomplish specific growth characteristics.
- First to develop the Cal-Mag soluble fertilizers that contain NPK plus significant levels of Calcium, Magnesium and minor elements all in one blend. (See our Cal-Mag fertilizers.)

Plant Marvel 5-12-26 Hydroponic Fertilizer

- **Designed as base feed in hydroponic system.**
- **Versatile application provides optimum nutrition for crops at different growth stages.**

5-12-26+ Hydro is formulated to compliment calcium nitrate in at wo-part hydroponic system. This analysis may be used at different mix rates, allowing nutrient ratio changes to address plant need sat different stages in the plant's growth cycle.

	DESCRIPTION	PRICE
PM51226	Plant Marvel 5-12-26 Hydroponic Fertilizer	\$42.84

General Purpose 20-10-20PLUS

General Purpose 20-10-20PLUS is an all purpose feed with elevated levels of Nitrate Nitrogen to give better nutritional control when feeding the cool darker months. Commonly used as a foliar application or root feed on ornamentals, turf and nursery stock. Because it is formulated to provide a balance of both major and minor elements, it is a safe choice when feeding a wide range of plant life with the same fertilizer. It will provide immediate but gentle nourishment in a form of application that can overcome and bypass other nutrient complication due to soil problems.

- Higher levels of Nitrate N
- Fully Chelated Minors
- 100% Soluble

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM201020	General Purpose 20-10-20PLUS	25 LB	\$37.56	\$36.06

Nutriculture General Purpose 20- 20-20

Nutriculture General Purpose 20- 20-20 provides over 60% nutrient value in a 1-1-1 ratio which makes it suitable for general use in a wide variety of growing situations. It is widely used on containerized stock in the nursery industry and for greenhouse crops such as foliage plants and bedding plants. For institutional and general landscape maintenance, it is ideal because it works well on turf, trees or shrubs as well as blooming plants and can be used as a single all-purpose spray feed.

- NPK and trace elements all in one mix
- Fully chelated minors

PM202020	Nutriculture General Purpose 20- 20-20	25 LB	\$39.65	\$38.06

Hi-Cal Special 15-0-15PLUS

Hi-Cal Special 15-0-15PLUS is a plug growing formula with high nitrate nitrogen, calcium, magnesium, and minor elements, all combined into a totally soluble mix. The trace elements are delicately balanced at levels that have proven to perform well. This formula will work well when phosphate is not a problem or is being supplied separately. Although designed for plug growing, this formula will work equally well on any crop that may be sensitive to ammoniacal nitrogen during low light periods. Test nutrient levels in both water and growing media prior to use. Suggested use on a constant feed basis is at 100 PPM nitrogen or on intermittent feed basis 200 PPM nitrogen. Use growth results and nutritional monitoring to adjust this rate.

- Increased Molybdenum
- High Nitrate Nitrogen

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM15015	Hi-Cal Special 15-0-15PLUS	25 LB	\$31.96	\$30.68

Plant Marvel 15-5-30 Pot Mum Finisher (K Mag)

This high potash formula is ideal for overcoming potash deficiency or for building up hardiness and fibrous qualities of stems and leaves. May be applied in solution by a proportioner through sprinkler systems, by irrigation or any conventional ground rig and may be applied in combination with most insecticides, herbicides and fungicides. Avoid applications during peak sunlight hours.

- Promotes stiff stems and sturdy leaf growth
- High nitrate N
- Provides magnesium
- Helps prevent tip burn

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM15530	Plant Marvel 15-5-30 Pot Mum Finisher	25 LB	\$39.53	\$37.95

Plant Marvel 18-6-18 Mag-Iron Fertilizer

Formulated for growers with high calcium bicarbonate water who need to compliment their magnesium level, while supplying additional Iron to insure uptake at an elevated media pH. The higher Iron levels are provided in two different chelated forms, EDTA and HDTPA. These will guarantee uptake even at extremely high media pH levels. This formula is also recommended as an excellent choice for managing lush green controlled growth on annuals such as calibrochoa, chrysanthemums, petunias, vinca, roses etc. With over 60% of its Nitrogen in the Nitrate form it will also work well as a dark weather feed.

- Elevated Iron chelated in two forms to handle a broader media pH range
- High magnesium

High nitrate nitrogen

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM18618	Plant Marvel 18-6-18 Mag-Iron Fertilizer	25 LB	\$38.46	\$36.92

Plant Marvel 16-3-16 Cal Mag Special

- Ideal basic feed for most low light situations.
- Multiple forms of iron chelation to work over a broad pH range.

Developed as an alternative to our Cal Mag 17-5-17+ to give greater control over vegetative growth without sacrificing the calcium and magnesium. It has a neutral potential acidity, and it also contains a combination of three different forms of iron chelates, EDTA, DTPA, and EDDHA, that makes iron available over a broader pH range, as well as in wet soil conditions. It will ensure availability under alkaline soil conditions. It also helps control the tendency to stretch and promotes healthier growth while inducing excellent longer-keeping blooms.

ITEM #	DESCRIPTION	PRICE	10+
PM16316	Plant Marvel 16-3-16 Cal Mag Special	\$37.56	\$36.06

Plant Marvel 15-5-15 Geranium Feed

This formula supplies most of its nitrogen in the nitrate form and is an ideal feed for crops responsive to nitrate nitrogen during low light periods and all ammonium sensitive plants. It is also an ideal source of calcium and magnesium that is immediately available and ideal for overcoming a calcium deficiency. It will maintain solubility in concentrate tank when calcium nitrate and/or magnesium nitrate are added. To avoid calcium precipitation do not mix with other fertilizers or materials that contain phosphate or sulfur compounds.

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM15515	Geranium Feed	25 LB	\$37.92	\$36.40

Plant Marvel 20-3-19 Petunia Feed

20-3-19 Petunia Formula has elevated levels of Iron and Magnesium and multiple chelate system specifically designed for Petunias and other high iron demanding crops. The extra iron prevents yellow tips while the magnesium works to help low leaves green. A high nitrate N and low phosphate feed that encourages dense, compact, healthy growth in Petunia and other flowering crops.

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE	10+
PM20319	Petunia Feed	25 LB	\$38.10	\$36.58

Plant Marvel Super Start 12-45-10PLUS

Super Start 12-45-10PLUS is especially designed as a starter solution which aids plants in rooting faster. It helps overcome transplanting shock. Its nitrogen content is low enough to prevent burning and still promote new top growth. Super Start is widely used in greenhouse and nursery operations to correct and supplement low phosphorous levels in established plantings. It is also very effective in promoting blossoming. Young vegetable plants being set in the field respond especially well to this starter formula. Use for seedling, transplants and rooted cuttings. Excellent for container azaleas and rhododendrons to promote compact growth and increase bud density.

- Establishes seeds and seedlings fast
- Develops strong roots

ITEM #	DESCRIPTION	QTY/WEIGHT	PRICE
PM124510	Starter	25 LB	\$46.08

Nutricote 14-13-13

Nutricote contains moderated initial releases and are not as sensitive to temperature as other controlled release fertilizers. If a slow release fertilizer releases too many nutrients early on, it defeats the purpose of using a controlled release fertilizer since the excess nutrients are leached away before a plant can use them. These higher fertilizer salts will begin to build up in the root zone and will eventually lead to suppression of the plant's growth. Unlike most fertilizers, Nutricote gives your plants the nutrients they need, when they need them, by having a uniform nutrient release pattern. Each analysis of Nutricote is available in a range of release periods specified by a Type number. A Type 100 means that at a constant soil temperature of 77°F, 24 hours a day a Type 100 will release 80% of its nitrogen evenly over a 180-day period.

Nutricote 13-11-11

Nutricote contains moderated initial releases and are not as sensitive to temperature as other controlled release fertilizers. If a slow release fertilizer releases too many nutrients early on, it defeats the purpose of using a controlled release fertilizer since the excess nutrients are leached away before a plant can use them. These higher fertilizer salts will begin to build up in the root zone and will eventually lead to suppression of the plant's growth. Unlike most fertilizers, Nutricote gives your plants the nutrients they need, when they need them, by having a uniform nutrient release pattern. Each analysis of Nutricote is available in a range of release periods specified by a Type number. A Type 100 means that at a constant soil temperature of 77°F, 24 hours a day a Type 100 will release 80% of its nitrogen evenly over a 180-day period.

Nutricote 18-6-8

Nutricote 18-6-8 Total 180 Day is great for seedlings to mature plants giving them a little boost of added nitrogen. This total package of N-P-K along with key micronutrients matches the needs of your plants over the growth cycle. Superior control and dependable nutrient release for the most affective feeding to grow strong healthy plants. Last up to 100 days. Sprinkled on top of potting medium. Application rates on package labels.

Quart Measuring Pitcher

These measuring and calibration pitchers are specifically designed for agricultural use. From a wide tapered spout that assures accurate pouring, to the open-ended handle that enables our pitchers to be gripped easily while wearing protective gloves. The durable pitcher is made in the USA from chemical-resistant polypropylene.

DC Irrigation Controller

Features

- Operate one valve or up to four stations with sensor and master valve (four station) without AC power hookup
- Four button keypad with an integrated LCD display
- Easy to read AM/PM clock
- Independent programming for each valve (four station)
- Can operate two valves simultaneously (four station)
- Digital icon indicates station in operation (four station)
- Automatic, semi-automatic and manual operation
- Operates with R710DC latching solenoids
- Irrigation suspension override (rain mode)
- Master valve wires included with the four station model
- Withstand harsh climatic conditions - rated IP68, the highest attainable code classifying the degree of protection against water intrusion (completely sealed and waterproof)
- Mount to valve or valve box wall
- Powered by one 9-volt alkaline battery (not included) featuring low power consumption
- Program stored for up to 20 seconds during battery change
- Single station includes the solenoid

ITEM #	DESCRIPTION	PRICE
DG540	D/C Four Station	\$115.92

Injectors

Automatic Proportional Fertilizer Injector

Economical, flexible and easy-to-use, the Add-It™ and Fertilizer Caddy™ Automatic Proportional Fertilizer Injectors are ideal for residential, commercial and greenhouse use including feeding lawns, shrubs, trees, flowers, raised beds, vines and potted plants automatically, without a pump, spreaders or hoses. They are available with capacities from one pint to 5 gallons and are designed to feed your plants using any liquid fertilizer nutrients or premixed liquid of water-soluble granular fertilizer through your drip irrigation, micro sprinkler, misting or sprinklers system. Add-It™ and Fertilizer Caddy™ Automatic Proportional Automatic Fertilizer Injectors are designed for use under the water pressure presented in any the irrigation system with up to 80 PSI.

Specifications

Operating pressure: 10 to 60 PSI (.7 to 4.2 BAR)

Minimum operating pressure: 10 PSI (.7 BAR)

Minimum flow rate: .5 GPM (2 L/M)

Sizes: 1 pint (.47 L)

Preset Ratio: 100:1, 100 parts water to 1-part additive

Temperature range: up to 130°F (54°C)

Inlet and outlet threads: FHT Inlet X MHT outlet or (FPT x MPT)

Material: PVC

Mounting position: Vertical

MixRite Injector 1:100

The MixRite 566AG injector is designed for a wide array of chemical and other additives. Accommodates water flow up to 11 GPM. MixRite Water Driven Injectors are water powered proportioning pumps that require no electricity and deliver accurate dispensing across varying water pressures and water flows. These units are ideally suited for in-line injection. MixRite injectors can provide in-line addition of fertilizer, insecticides and pesticides for agriculture and irrigation, dosing of livestock vitamins into the water supply plus many more uses. Includes suction tube with foot strainer and hose clamp and a replacement seal kit.

ITEM #	DESCRIPTION	PRICE
MIXRI1:00	MixRite Injector 1:00	\$277.89

Dosatron Injector Maintenance Kit

The NEW Mini Maintenance Kits were designed to be an economical solution for the Dosatron user and grower who performs maintenance on a regular schedule.

The kits include wear parts, Dosa-Klean, and our new product — Dosa-Lube, and were created for the 11, 14, 20, 40, and 100 GPM injectors.

L GHF27	Plastic Hose Mender - 5/8" to 3/4"	\$1.51

NOTICE:

The new lead law requires all potable water fittings to be lead free. Since then, most of our vendors are carrying just one line of lead free brass. The price of lead free brass is very comparable to stainless steel. In light of this, we will be switching all brass fittings to stainless steel fittings.

Plastic Twin Shut-off Valve

- Twin shut-off valves control water flow for two hoses
- Cap type valve handles resist breakage
- Longer legs prevent hose kinks at faucet
- Full ball and retainer rings reduce leakage, even at low pressure
- Durable, rustproof polymer construction

ITEM #	DESCRIPTION	PRICE
GHF770	Plastic Wye	\$2.44

Bulk Garden Hose

Try our higher quality hexagon shaped garden hose for better kink resistant and durability. Instead of bulky hose clamps, we can crimp the hose ends. Order a custom length 5/8" or 3/4" garden hose.

SUP5C	Battery Spray Caddie	\$379.84

Surflow Pump 12V

- 2.1 GPM, 100PSI
- ShurFlo Electric Diaphragm Pump
- Heavy-Duty, Quality Components
- Self-Priming, Can Be Run Dry
- Used In Spraying, Construction Equipment, Recreational Vehicles, And Fluid Transfer Applications

ITEM #	DESCRIPTION	PRICE
SHUPUM		\$194.29

Electric Sprayer 4 gal

The Back Pack Sprayer is a rechargeable, battery-powered sprayer that fits comfortably on your back.

Operating at a maximum pressure of 150 psi, the electric sprayer offers an adjustable pressure knob for flexibility in spraying. Using the high-pressure setting, sprayer atomizes spray solutions better than other backpack sprayers, ensuring excellent coverage.

The battery-operated pump ensures even flow rates, perfect for even application of plant growth regulators, insecticides, fungicides, herbicides and other greenhouse chemicals. It can run for up to 1 hour on a full charge and recharges in 4 hours. The 4 gallon tank capacity is just the right size. Perfect for spot treatments or concentrated applications, but small enough to still be comfortable to wear.

ITEM #	DESCRIPTION	PRICE
GGA100		\$547.84

Single Head Model

Dual Head Model

Fogit Greenhouse Sprayer

The Fogit Greenhouse Sprayer applies chemicals at a low-volume rate. This means that the same amount of active chemical is applied to a given area, but the chemical is diluted into reduced amounts of water. Because low-volume is very efficient, many users have found that lower volumes of chemicals can be used with the same results.

The Fogit Greenhouse Sprayer will require a minimum of 2 liters of water and the chemical to treat 5,000 sq. ft. If less than 5,000 sq. ft. is treated, a minimum of 2 liters of water is still used.

The Fogit Greenhouse Sprayer will do a greenhouse 75 feet in length. If a greater distance is needed, it will need circulating fans in the greenhouse or a dual head model.

Low-volume application is only possible when extremely fine particles are produced. The micronized chemicals stay suspended for up to 6 hours and are distributed by horizontal airflow fans and natural air currents.

Container volume is approximately 4 liters and it takes 3-4 CFM of air to operate the fogger. 9 CFM for the dual head.

ITEM #	DESCRIPTION	PRICE

Greenhouse Supplies

Pre-Wound Tomato Hook

29'+9' Freefall Twine; The double tomato hook with twine is used in greenhouse tomato production. It makes trellising easier, in addition to providing strong support. This hook type is very fast and easy to install, thus saving considerable time. It has two rolls of twine, one to use immediately and the other to drop as needed. Lead time is 7 days.

ITEM #	PRICE	336+
PTH	\$0.25	\$0.23

Roller Hook

The process of plant's lowering is one of the most time-consuming tasks for workers. Not only it is difficult to control the lowering height, but also the plants can be damaged. Designed to ensure a full control of the plant's lowering at minimum cost, the RollerHook is composed of a re-usable metal frame and a disposable spool. RollerHook is the perfect solution for an easy and efficient trellising of greenhouse tomato plants.

Ken-Bar Heat Mats

Made by Ken-Bar, these heat mats are low cost, durable, flexible, and performance-wise the system is better than conventional sources of electrical bottom heat. Ken-Bar uses Thin Film Technology, which creates the most electrically efficient heat element on the market today. Heat is generated by electric current flowing through the black bars which are resistive/conductive material. Spaced close together and zigzagged, these bars emit a virtually continuous heat pattern. Studies show an even bottom temperature gets better germination and a better developed plant.

Digital Hose End Timer

The B09D 3/4" Digital Hose End Timer, one in DIG's newest range of hose end timers, offers simplified programming and improved monitoring of battery power with less current, resulting in longer battery life and more reliable operation. With higher flow rates at lower inlet pressures and a range of programming features, the B09D delivers a reliable and cost-effective solution for residential use. The timer has four start times per day with durations from 1 minute to 12 hours 59 minutes in an operating flow range of .5 to 6.3 gallons per minute, allowing use in a wide range of applications including drip irrigation or micro sprinkler systems connected to a garden hose or faucet/spigot. It uses one 9-volt alkaline battery that can last for over a year.

ITEM #	DESCRIPTION	PRICE
DG9001D	Battery Op Garden Hose Controller	\$38.83

Dramm Hozon Syphon Mixer

The syphonject draws a concentrated solution from a bucket through a flexible suction tube. The solution is then diluted as it enters the water stream at an approximate ratio of 20 parts water to one part concentrated solution. Requirements: A full flow nozzle 3-5 GPM., Minimum water pressure at faucet 35 PSI, max hose length of 50', any restrictions in the line downstream will cause backpressure and it will not work.

ITEM #	PRICE
GGA200	\$15.61

2.0mm Tomato Grafting Clip

ITEM #	DESCRIPTION	PRICE
GROLI	18 Watt, AC Red Grow Lights	\$58.70

Insect Sticky Traps

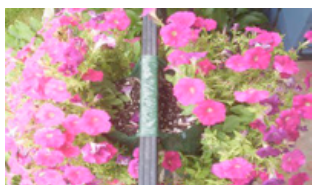

Insect Sticky Traps are double-sided for maximum efficiency. These 3-inch by 5-inch traps have both a yellow and blue side. An easy-peel film maintains stickiness while a pre-punched hole makes them easy to hang. This pack contains 48 traps. Different colors attract different species of pests. The yellow and blue coloration traps is the ideal color combination for trapping the most species. The yellow side of the trap attracts whiteflies, fungus gnats, shore flies, winged aphids, leaf miners, scale, and many other species. The blue side entices flying adult thrips. Insect Sticky Traps are an essential addition to any integrated pest management (IPM) program. By monitoring the amount of insect pests attracted to the Pestrap™ Cards, you can decide whether it's worth spraying or not. They are weather-resistant and non-toxic, allowing you to hang them nearly anywhere.

Black Knitted Shade Cloth

Black knitted shade cloth is made from 100% UV stabilized polyethylene. Its unique lock stitch construction allows customers the ability to cut the fabric with scissors without further unraveling. Knitted shade is available in a variety of colors and stripes. Its lightweight and durability make it a superior choice for all types of shade applications.

Black Custom Woven Shade Cloth

Made from 100% polypropylene mono-filament strands. UV stabilized. The sewing team can customize panels to any size. They use #4 brass grommets and 2.75" reinforcement tape. The taped edges are double stitched for extra holding power. Available in shade percentage: 30%, 74%, 55%, 63%, 73%, & 80%. Standard seams are 6', 10' & 12' and any can be seamed and/or cut to make your custom width. Call 717.532.5918 for a quote. Please specify length, width, shade percentage, and grommet spacing. Allow several weeks lead time.

Sensaphone Monitoring System

The Sensaphone monitoring systems offer small business owners, vacation property owners and other property managers an easy and inexpensive way to monitor a remote facility. Previously called auto dialers these systems notify you if they sense undesirable temperatures or other conditions. When the system is connected to a standard telephone line, you can record custom alert condition notifications and receive alarm messages in your own voice. This system can set off a local alarm if a phone line is cut and control a thermostat to adjust site temperature between 2 set points. Non-volatile memory retains system settings in the event of power loss. You can call in by phone to get the status of each monitored condition.

- Auto dialer temperature alarm provides instant notifications
- Simple, convenient, cost effective remote monitoring for vacation homes and property managers
- Record custom voice alerts and receive alarm messages in your own voice
- Receive voice alerts and alarm notifications over standard telephone lines
- Notifies up to four people by voice phone call in the event of an alarm
- Up to four or eight external sensors monitor temperature, humidity, water and more
- Included relay output can switch local devices on/off based on alarm activity

Use a dual setback thermostat to control temperature between two set points

Never Dig

Have you ever spent the better part of a day busting up concrete and digging just to replace a leaking water hydrant? We have created a solution to this problem – the 'Never Dig' Outdoor Water Hydrant Sleeve kit. This kit can be used to replace an existing hydrant or when installing a new one. After installing our 'Never Dig' Hydrant Sleeve, you will not need to cut through concrete or dig up an area just to replace your hydrant. Changing your hydrant will be an easy process, the sleeve protects the hydrant and allows you to simply pull out the old, faulty hydrant before reattaching a new one. It's that simple.

ITEM #	DESCRIPTION	PRICE
FMNEVDIG	Never Dig Hydrant Sleeve Kit	\$69.37
FMBRA	Never Dig SS Hydrant Bracket	\$21.72
FMRUBCAP	Never Dig Rubber Cap for 1.25" Pipe	\$15.28

Frost Free Hydrant

The Merrill Any Flow® Yard Hydrant gives year-round water service to customers in all weather conditions. The unique design of the Any Flow's plunger assembly increases the plunger's life expectancy by 200% over others in the industry. The use of a pivot connector and nuts enables easy adjustments for years as opposed to set screws that quickly rust into place. Full lever control allows the Any Flow® to run at a trickle to full flow and everywhere in between by just moving the handle. Designed with swivel parts, the Any Flow® can have its internal parts removed and replaced all without a need to dig up the hydrant. The use of a drain hole ensures that water drains from the standpipe allowing the Any Flow to be your year-round water solution in all climates.

ITEM #	DESCRIPTION	PRICE
HYD073	Any Flow, 3/4" Frost Free Hydrant	\$144.39
HYD103	Any Flow, 1" Frost Free Hydrant	\$183.12
