If you need a specific shipping carrier, Please call us to arrange shipping.

When shipping LTL Motor Freight, we broker with various shipping carriers to find you the best possible rates.

TABLE OF CONTENTS

Most equipment and pumps have a two year warranty. Warranty is provided directly from the manufacturer to you as the customer. Please contact the manufacturer to claim a warranty.

Product specifications and availability are subject to change without notice and substitute items may occasionally be shipped.

We recommend you to mail, or fax your orders in a minimum of two weeks before you pick up them up, or need to be shipped. We reserve the right to pro-rate items in short supply. Prices are not guaranteed.

Early orders placed and not picked up by Feb. 15 will be subject to available supplies and updated Prices.

Order onion sets early and pickup on or before our indicated pickup date to avoid spoilage.

Returns policy: Salable products in their original packaging may be returned with permission. (10% restocking charges apply).

Note: Seeds, onion sets, fertilizer, special order items, and discounted items not returnable under any condition.

Credit refunds: In case of over payments, shortages, etc. credit invoices will be issued and expire after one year.

All claims for damaged and missing items on a order MUST be made within 5 days from receiving the shipment. A signed proof of deliver noting the damage or missing items must be included. We will not be honoring any claim issues after the 5 days. This would also apply to any orders picked up at our warehouse, customer is required to verify all items on the order within 5 days.

Mesh Produce Bag

These versatile mesh produce bags find uses around your farm and market. Harvest, transport, market, and store items like apples, onions, peppers, potatoes, and sweet corn. Sturdy mesh allows customers to see produce at market, while bags make transport and organization easy for you. Breathable mesh allows storage crops like onions, potatoes, and perennial bulbs to release excess moisture. Since bags hold up in water, they are ideal for soaking and rinsing harvested greens, peppers, or root crops. Each woven poly bag has a built-in draw cord that quickly closes the bag and acts as a handle for transport.

Row Cover

This Row Cover protects against cold temperature, frost, wind, insects and birds including whitefly. Ideal for packing out earlier (or later-fall) quality produce. This unique non-woven fabric has remarkable tear resistance, and is U.V. stabilized. Allows majority of the light to reach the crops, which provides ideal day and night time cover protection. The 31', 36', 42', and 50' .56 oz. crop cover has reinforced edges.

- Light weight to gently protect young plants without crushing.
- Protects against light frost. Raises soil and air temperature by several degrees F.
- Earlier Planting.
- Earlier or Later harvests.
- Accelerated Growth & Higher Yields

Yukon Gold

Mid-to-late season • Yukon Gold is a large variety of potato most distinctly characterized by its thin, smooth eye free skin and yellow tinged flesh. Unlike some other potato the Yukon Gold can stand up to both dry heat and wet heat cooking methods. Its waxy moist flesh and sweet flavor make it ideal for boiling, baking and frying but these potatoes will also withstand grilling, pan frying, and roasting.

Reba

Mid-to-late season • Excellent flavor--one of the highest rated in taste-tests Good for baking (not too dry, not too moist), potato salads, boiling, mashing, chipping. Bright white flesh. Shape: Round to oval to oblong. Skin: Smooth, bright white to buff colored.

Potatoes

Yukon Gold

Mid-to-late season • Yukon Gold is a large variety of potato most distinctly characterized by its thin, smooth eye free skin and yellow tinged flesh. Unlike some other potato the Yukon Gold can stand up to both dry heat and wet heat cooking methods. Its waxy moist flesh and sweet flavor make it ideal for boiling, baking and frying but these potatoes will also withstand grilling, pan frying, and roasting.

Reba

Mid-to-late season • Excellent flavor--one of the highest rated in taste-tests Good for baking (not too dry, not too moist), potato salads, boiling, mashing, chipping. Bright white flesh. Shape: Round to oval to oblong. Skin: Smooth, bright white to buff colored.

Kennebec

Mid-to-late season • A popular all-purpose potato with smooth skin and texture, and white flesh that resists late blight and yields heavily at midseason. The Kennebec potato is a high-yielding, fast growing, widely adapted and vigorous potato variety with excellent storage qualities. Not only is it sold as a fresh market potato, it is widely distributed for processing as frozen fries and potato chips.

Eva

Mid season • Bright white skin and white flesh with texture a little mealy lend these tubers to mashing, baking, and home-made chips! Excellent storage. Resistant to golden nematode, common scab, viruses, early blight and hollow heart. Does everything well in the kitchen and has good flavor.

Lehigh

Late season • A great all-purpose potato: good for baking, mashing, boiling, frying, home-fries and they make a mean potato salad. Potato growers found that Lehigh offered consistently high yields across very diverse growing regions. These round to oblong, slightly flattened tubers with appealing yellow flesh provide good flavor. Resistant to blackspot bruise; tolerant to scab.

Red Norland

Early-midseason • Selected for richer red skin color. Round to oblong tubers have white flesh, store well, and are excellent for boiling. The "Red Norland" potato is great for cooking, very healthy and easy to grow! Very good for boiling and salads. Good for frying, roasting, and French frying. This is an outstanding red potato that offers both great flavor and heavy yields.

Red Pontiac

A mid-season variety • Offers sweet, solid white flesh with a flavor you just have to try to believe! The large, round tubers hold their shape and color during cooking, making them a great all-around choice for boiling, baking, frying, and mashing. If you just can't wait until harvest time for a potato fix, pluck these new red potatoes earlier for a simple, tasty treat - boiled, lightly seasoned, and straight to your plate!

Superior,

White, Superior is a widely-grown, popular variety. Early maturing, moderately-high yields, and minimal skinning enables growers to dig and market quickly. Round to oblong tubers with buff, slightly flaky skin and white flesh are suitable for many uses. Good resistance to internal defects and common scab. Reliable and early, Superior is always one of the first varieties Excellent for chipping, but suitable for all cooking styles.

All of these potato varieties are available in Size B as well. Size A's are 1.5"-3.25" and they usually require cutting. Size B's are 1.5"-2" and usually are planted whole.

VYB-.50	.5 m	\$85.40
VYB	1 m	\$81.33

Watermelon - Triploid

Seedless watermelons require special conditions to germinate. They may not field germinate and it is recommended to get an experienced grower to start them. Potting soil must be light and coarse and temperature 90 degrees. Water and heat soil before planting, and seed 1" deep. Do not water again until they emerge, 2-4 days max. Then keep heat stable at 70" until planting.

VGGW Red Garnet Hybrid Tripliod

Red Garnet has consistently shown outstanding seeding vigor in the greenhouse producing stout transplants and in field providing a strong aggressive vine that provides excellent fruit coverage and sun protection. Red Garnet is a dark green stripe type seedless watermelon showing wide adaptability in commercial fields throughout most North American production areas. The strong vigorous plant produces uniform 16-20 lbs. of oval fruit with deep red flesh in about 84 days.

A note from us:

If you order any watermelon seeds you're automatically agreeing to the following terms: Bacterial fruit blotch (BFB) on melons caused by *acidovorax avenae* subsp. *Citrulli* is a serious disease that has become a significant risk factor in many areas where melons are grown. Gummy stem blight (GSB) is caused by a fungus, *didymelia bryoniae*, that attacks melons and cucurbits. Yield loss due to GSB occurs as a result of rapid defoliation of vines and fruit infection and decay. The pathogen causing BFB of GSB can be introduced into a field by infested seed, infected transplants, cucurbits, mechanical means or natural spread for alternate hosts. It is impossible to conduct any test which has 100% reliable results in identification of any seed borne GSB or BFB. However manufacturers are doing their best to test and/or treat the melon seeds and any seed sold is tested to current industry standards.

All seed sold by Martin's Produce Supplies is tested by the manufacturers and are warranted by the manufacturers that the test results have shown no evidence to BFB or GSB. But they cannot guarantee that the seeds are free of BFB or GSB. In no case shall Martin's Produce Supplies or the Manufacturer be held responsible for anything beyond the original purchase Price and if in any event Martin's Produce Supplies is forced to take legal action the purchaser shall be responsible for any legal/ attorney fees. Martin's Produce Supplies cannot be held responsible for any losses or damages relating to BFB and/or GSB. No warranty is given to any melons or cucurbits.

Vacuum Seeder

- An economical, fast, and easy way of seeding seeds into trays
- Seed plates are made of aluminum and are very easy and quick to change via clamps
- Easy to use, Hook up a vacuum to hose, spread seeds over plate and seeds will be vacuumed to the micro holes in plate, flip seeder box to the side with the seed reservoir section down and excess seed will fall into seed reservoir section, then turn the over the seeder box upside down over the tray and close valve to cut vacuum and seeds drop into tray
- Multiple tray sizes available

Why Miller?

HERE'S WHY!

Miller is your trusted partner for exceptional crop production. At Miller we've been solving the tough problems for growers globally for over 80 years. Leading the way in science, experience and education, we develop products specifically engineered to deliver superior results, one crop at a time.

- Our team is comprised of highly trained agronomists, horticulturalists, and crop advisors who provide technical support and product programs designed to maximize return on investment
- Miller makes sure that raw materials used contain the lowest possible level of chlorine and in some cases, are totally free of chlorine
- Miller only uses 100% EDTA chelated micronutrients

MIL320, 20-20-20

Nutri-Leaf® 20-20-20 + Micros is a balanced soluble nutrient fertilizer of high technical grade with micro elements. It is designed to increase the yields of the crops throughout their growth cycle where balanced fertility is required for vegetative and crop development.

Potassium Nitrate 13.5-0-46.2

Potassium nitrate is mainly used in fertilizers, as a source of nitrogen and potassium - two of the macronutrients for plants. When used by itself, it has an NPK rating of 13.5-0-46

ITEM #	QTY/WEIGHT	PRICE
PN50H	50 lb	\$64.64

Calcium Nitrate (greenhouse grade)

Highly pure white very fine crystals. Easily and totally soluble calcium nitrate that dissolves like no other calcium nitrate. All nitrogen is in the nitrate form and it does not contain any ammonium nitrogen. It is a very low nitrogen with a high calcium content. Made in the USA.

ITEM #	QTY/WEIGHT	PRICE
CNG50	55 lb	\$27.41

Plant Marvel 12-45-10 Fertilizer, Starter

A starter solution which aids plants in rooting faster. It helps overcome transplanting shock and is widely used in greenhouse and nursery operations to correct and supplement low phosphorous levels in established plantings. It is also very effective in promoting blossoming. Young vegetable plants being set in the field respond especially well to this starter formula. Use for seedling, transplants and rooted cuttings.

ITEM #	QTY/WEIGHT	PRICE	10+
PM124510	25 lb	\$46.21	\$44.36

Plant Marvel 20-20-20

Nutriculture General Purpose 20- 20-20 provides over 60% nutrient value in a 1-1-1 ratio which makes it suitable for general use in a wide variety of growing situations. It is widely used on containerized stock in the nursery industry and for greenhouse crops such as foliage plants and bedding plants. For institutional and general landscape maintenance, it is ideal because it works well on turf, trees or shrubs as well as blooming plants and can be used as a single all-purpose spray feed.

ITEM #	QTY/WEIGHT	PRICE	10+
PM202020	25 lb	\$39.65	\$38.06

Mono Potassium Phosphate 00-52-34, (water soluble)

The preferred source of phosphorus and potassium when nitrogen fertilization should be limited. Can be applied in combination with other fertilizers to meet crop nutritional needs throughout the growth cycle.

- At the early stages of the growth season when phosphorus and potassium are needed at high rates for the establishment of root system.
- During the productive stages of sugar-rich fruit crops, to increase sugar content and to improve fruit quality.
- Fully water-soluble
- Consists of 100% plant nutrients
- Free of chloride, sodium and other detrimental elements for plants
- Safe for plants and humans, due to moderately low pH and low salt index

ITEM #	QTY/WEIGHT	PRICE
MPP50	55 lb	\$99.27

Liquid Fertilizers

Nutri - Cal 2.5Gal

Nutri-Cal® liquid calcium solution for foliar application on fruit and vegetable crops is a unique formulation, consisting of T.O.G., an organic complexing agent which masks the calcium ion, creating a molecule that is easily absorbed and is efficiently transported throughout the plant to the fruit cells. There are no chlorides or sulfates. It has a low salt index and is therefore non-corrosive. Nutri-Cal® liquid calcium supplement improves firmness and storage life. University research and use by countless growers has proven the capability of Nutri-Cal® liquid calcium supplement to improve fruit quality and firmness -- increasing storage life. Longer storage life means marketing your product when Price is best and selling at premium Prices.

ITEM #	QTY/WEIGHT	PRICE	2+
NUTRICAL	2.5 gal	\$50.21	\$48.70

Nutri - K 2.5Gal

NUTRI-K is a special liquid formulation of highly soluble potassium and a unique complexing agent T.O.G.. This combination provides a high quality and readily available source of potassium to be utilized by plants. NUTRI-K contains NO nitrates, chlorides or sulfates. NUTRI-K has a low salt index and is non-corrosive. Nutri-K may be applied to a wide variety of horticultural, turf, greenhouse, ornamental and all agricultural crops. Potassium requirements for most crops increase during periods of rapid growth and fruit development. Application of Nutri-K should be made based on soil and/or plant tissue analysis for potassium.

TGP28002.5	2.5 gal	\$51.14	\$49.61

Companion® Biological Fungicide Wettable Powder

Companion Biological Fungicide is a broad spectrum biological fungicide [and bactericide] for the prevention, control or suppression of many soilborne and foliar diseases on the labeled agricultural crops.

Apply as a foliar spray or as a soil drench alone or in an alternating spray program with other EPA-registered crop protection products.

Companion® Wettable Powder contains the active ingredient *Bacillus amyloliquefaciens* strain ENV503, a plant growth-promoting rhizobacterium that quickly establishes beneficial colonies on the plant's roots and leaves. It protects the roots from invading pathogens, stimulates healthier roots and improves nutrient uptake. *Bacillus amyloliquefaciens* strain ENV503 is also known to trigger the plant's immune system (ISR).

Companion® can be used on all plant material and is most effective when applied prior to the onset of disease. Use in combination and/or rotation with chemical fungicides and bactericides to enhance disease control and reduce the occurrence of resistance. For use on the labeled field-grown agricultural crops including vegetables, herbs, small fruits, berries, and fruit trees. For use in greenhouse production and hydroponics.

ITEM #	QTY/WEIGHT	PRICE
FUNCOWP	5 lb	\$237.59

Essential® AG 1-0-1

Provides a Rich Source of Building Blocks

- Use on all types of Agriculture, Greenhouse & Nursery Crops
- Dip or Drench Cuttings
- For Planting, Transplanting & Sizing Up
- Soil Application Only

Essential AG 1-0-1 (Essential AG) is derived from potassium carbonate, fish protein hydrolysate, glucose, and a natural wetting agent. Essential AG is colloidal liquid

solution that provides a rich source of building blocks not found in typical nitrogen-phosphorus-potassium (NPK) fertilizers. A high concentration of humic acid may aid in the uptake of micronutrients. Essential AG is compatible with most other fertilizers and products and requires no special handling. When tank mixing Essential AG it is best to perform a compatibility jar test.

TGP101	2.5 gal	\$144.75	\$140.41

CELL POWER® BALANCED

A complete liquid fertilizer blend 10-10-10 with micronutrient and OMEX's proprietary EBA Technology. When applied to crops provides N-P-K and essential micronutrients that help with plant growth, reduce nutrient deficiencies and aid in reducing abiotic stress. BALANCED can be applied foliar or through drip irrigation at 1-4 quarts/acre. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMX101010	2.5 gal	\$75.90	\$73.62

CELL POWER® LEAF ACT™ #1

A complete high Phosphorus liquid blend fertilizer 3-13-7 with essential micronutrients and OMEX's proprietary EBA Technology. Apply early in the season following transplanting or seeding for strong early root development and increased photosynthesis. LEAF ACT™ #1 can be applied foliar or through drip irrigation at 1-4 quarts/acre. LEAF ACT™ #1 may also be applied any time throughout the season when crops are showing signs of P deficiencies. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMX3137	2.5 gal	\$60.72	\$58.90

CELL POWER® LEAF ACT™ #2

A complete higher Potassium liquid blend fertilizer 3-6-13 with essential micronutrients and OMEX's proprietary EBA Technology. LEAF ACT™ #2 can be applied foliar or through drip irrigation during reproductive growth stages of plant development at 1-4 quarts/acre to improve growth and development. Apply LEAF ACT™ #2 throughout the seasons as a finisher fertilizer to increase sugars, fruit size, protein synthesis and maturity in a wide range of crops. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMX3612	2.5 gal	\$70.84	\$68.71

CELL POWER® SizeN® 15-0-7

An innovative product that supplies nitrogen in a form that encourages compact shoot growth, better rooting, and better fruit development. SizeN® 15-0-7 is a stabilized Amine Nitrogen with potassium nitrate that encourages reproductive growth and root development as well as starch synthesis, sugar, water and nutrient transport. Apply SizeN® 15-0-7 at 2 quarts/acre through drip irrigation, foliar, center pivot, solid set and micro-irrigation systems. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMX1507	2.5 gal	\$99.51	\$96.52

CELL POWER® K25

A powerful blend of urea, potassium carbonate and Ascophyllum nodosum provides a great way of supplying extra potassium as a foliar spray to crops during periods of high demand for K. The Ascophyllum nodosum seaweed is present to help increase the cell division in the harvestable portion of the crop. Apply K25 at 1-2 quarts/acre foliar as needed, every two weeks to increase sugar production and movement into target sink tissue. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMXK25	2.5 gal	\$87.10	\$84.49

CELL POWER® Calcium Gold 7-0-0

A calcium nitrate formulation with a unique calcium delivery system. Calcium Gold contains pioneering LoCal Technology which supports the plants natural processes to enable Calcium absorption where a plants natural system is unable. Apply Calcium Gold foliar at the rate of 1- 4 quarts/acre from flowering throughout the season for firmer, larger fruit with increased Brix and stronger shelf life. See label for full recommendations and compatibility.

ITEM #	QTY/WEIGHT	PRICE	2+
OMX700	2.5 gal	\$82.65	\$80.17

CELL POWER® OMEX SLYCE 8% Calcium

SLYCE®Ca8%: Is a soil amendment derived from calcium nitrate and humic acid to aid in improving water penetration and soil tilth. SLYCE®Ca8% applied to the soil through irrigation or side dressed at the rates of 1-5 gallon per acre; reacts with soil nutrient components and creates a faster and more efficient availability of nutrients. See label for full recommendations and compatibility.

CleanOut Tank Cleaner

CleanOut aids in the reduction of spray tank residue. Since the amount of residue varies, individual conditions will directly affect use rates of CleanOut.

USE RATES, 1 quart of CleanOut treats up to 100 gallons of spray solution. Circulate cleaning solution throughout entire system. Use high pressure spray to clean and rinse interior of spray tank. Purge tank systems, spray lines and nozzles. Drain out and completely rinse tank again using clean water. Always use enough CleanOut to completely remove all residues.

CAPSIL

CapSil ensures uniform spreading and coverage of foliar directed sprays on the first application. You get the results you expect and avoid the expense of unnecessary repeat treatments. CapSil is a 100% active blend of organo-silicone and non-ionic surfactants that enables solutions to spread over the entire leaf surface evenly. Benefits of using CapSil include: Ensures uniformity and spreading of foliar applied products Reduces disease incidence. Safe to use – no concern of burn.

Ezi-action Drum Pump

Ezi-action® 200/55 Drum Pumps have provided safe, effortless dispensing since their conception in 1991.

Empties all contents from container. Vertical location of pump in the drum means no bending and no risk of back injury or back ache when dispensing liquid. Heavy 55 Gal. containers can remain in a safe, upright position. Customers can confidently buy in bulk, reducing overhead costs. Can also be used for pumping from or 25 gallon drums. Recognized as the best hand drum pump in the world.

Wobbler

The Wobbler, first introduced in 1980, uses Senninger's off-center rotary-action technology, which provides extremely uniform coverage over a large diameter at low-pressures. It produces droplets that resist wind-drift and are applied in a gentle rain-like pattern. The Wobbler is constructed entirely of engineering grade thermoplastics for excellent corrosion resistance and is extremely durable due to having only one moving part.

Inverted Mister

The patented Senninger Mister's innovative built-in check valve design prevents damage to plant material below due to drainage immediately following each irrigation session. It also helps to assure water conservation and consistent system start-up delivering an instantaneous, highly uniform distribution ideal for short-cycle applications.

Features

- Outstanding uniformity
- Bridge-less design for uninterrupted
- 360° pattern
- Easy to clean nozzle and optional check valve, quick twist tool-free disassembly
- Multiple connection options to retrofit existing systems
- Color-coded nozzles
- Engineering-grade UV-resistant thermoplastic construction

High Angle Smooth Drive Sprinkler

Senninger's new Smooth Drive's unique walking diffuser helps deliver an extremely uniform pattern, without distortion from bracket legs.

Features

- Low Angle (LA) model is ideal for under trees
- High Angle (HA) model for open field
- Walking diffuser - for outstanding
- uniformity, no bracket-leg shadow and gentle application
- Precision-contoured deflector - provides greater throw and enhanced distribution
- Advanced braking mechanism - for smooth, consistent rotation speed and minimal riser stress
- Rugged design - stands up in harsh field conditions

All T Sprays

The Senninger T-Spray delivers a fine spray - ideal for delicate stock. It can be mounted upright or inverted and is also available in a high angle model for upright installations only.

Features

- 360° Spray nozzle.
- No moving parts for longer life
- High-angle upright T-stem provides larger diameter of coverage
- Color-coded stems for easy size identification

Senninger 4123

Senninger's Part-Circle sprinklers are designed specifically for use where a directional impact sprinkler is required. Engineered to deliver maximum efficiency at low to moderate flow rates for agriculture, nursery, effluent disposal, dust suppression, and industrial applications. Reach diameter based on 1.5 height.

Features

- Distributes water in a 60° - 360° adjustable pattern in 5° increments, no tools needed
- Easily convertible to full-circle operation
- Covered reversing mechanism
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Inlet size: 3/4" M NPT
- Flow range: 2.42 to 16.10 gpm (550 to 3657 L/hr)

Pressure Regulators

Pressure regulators are recommended for all drip irrigation systems. If no pressure regulators are used high pressure surges or high pressure operation can cause damage to drip tape. Regulators should be installed close to the field being irrigated. The 1.5" regulators have springs to maintain a constant pressure. These springs can be changed to change the pressure. NOTE: Flow rate on all regulators must be matched to your drip irrigation system or field size. These pressure regulators are flow activated, water must be flowing through to make them work.

Ultra High Flow Pressure Regulator

Introducing Senninger's New Ultra High Flow Pressure Regulator

The PRU (Pressure Regulator Ultra) is designed to maintain a preset pressure for higher flows of 20 to 100 gpm (4542 to 22713 L/hr). The compact size makes it convenient for use in a valve box. Its 2-inch inlet and outlet size make it an ideal option for accurate zone and individual sprinkler pressure control. One PRU can be used in place of a manifold of multiple smaller regulators. Reliable: Accuracy and quality you can count on with Senninger pressure regulators, Convenient: Compact size fits in a valve box, Economical: Competitively Priced

Garden Drip Kit

Garden Drip Irrigation Kit (20 rows)

This is a complete garden irrigation kit in a box. It has everything you need to set up your garden up to 20 rows 50' long or a total of 1,000' of row length.

Kit includes;

- 1- Roll of Chapin 6" Drip Tape 1000'
- 1- Roll of 3/4" x 100' Orchard Tubing (55 PSI)
- 20- Drip Tape Valve w/Green Handle .250 Barb Fitting
- 20- Drip End Sleeves
- 6- Yellow Drip Coupling w/clear lock nuts Fitting
- 1- Pack of Goof Plugs 1/8"- 1/4" Holes (Pack of 10)
- 1- 1/8"-1/4" Economy Punch
- 1- 3/4 Dig Filter w/Regulator Fht x Mht assembly
- 1- 3/4" Power-loc x Fht Fitting
- 1- 3/4" Power-loc End Cap Fitting

LARGE ANNUAL PLUG, GREENHOUSE & PRODUCE EQUIPMENT AUCTION

Saturday, March 2nd 2024 @ 9:00 A.M.

AUCTION HELD AT SHIPPENSBURG AUCTION CENTER, 1120 Ritner Hwy Shippensburg, PA 17257, Approx. 1 mile North of Shippensburg on RT. 11 / or From Rt. 81 take King St. Exit 29 , go West on Rt. 174 at light, turn R. on Conestoga Rd., then right on Rt. 11 to Sale on right

Top Quality Plug Auction

Large Variety of vegetative, & seed annuals, perennials, succulents, vegetables, herbs & much more; **Expecting approx. 3,000 trays;**

New & used supplies, Always a nice line of gloves, tape, dry line, seeds, valves, Liners, knives, sprayers, drip tape, ½” plastic irrigation tubing & more;

Plastic layer; sprayers; water wheel trans planters, pumps;

Call with consigned items 1 month before Auction for best advertising;

No Consignments Day of Auction unless prior arrangements are made;

AUCTIONEERS NOTE: Bring a friend, selling plugs w/ 2 auctioneers; Plugs start @ 9:00 A.M. Sharp; Selling w/ 3rd auctioneer on produce & greenhouse equipment & supplies;

ATTENTION PLUG CONSIGNEERS: We must know beforehand the amount of plugs you want to consign; Please contact Larry

Auction Coordinator: Larry Burkholder 717-532-2070

DAN Modular Micro Sprinkler

Dan Modular is the original micro-sprinkler that set the standard for all micro-sprinklers. The broad range of flow rates, wetted diameters and patterns from full to part circle with different sprayers, swivels, and anti-mist devices that produces small, medium, and large droplets makes it practically a universal device for agriculture, greenhouse, and landscape applications. For over two decades Dan Modular has been the product of choice as a standard micro-sprinkler for greenhouse applications.

NAANDANJAIN

Product Features

- Dan Modular design offers comprehensive flexibility in an irrigation design
- Adapts to almost any field condition
- Broad range of flow rates, 10 nozzles and 4 anti-mist devices produce 14 flow rates from:
 - 9.2 to 79.3 GPH @ 29 psi
 - 7 static spreaders and 5 swivels produce a wide variety of patterns and diameters
 - Provides a range of desired droplet sizes from fog to mist to large droplets
 - Field friendly, may be assembled and disassembled in the field
 - Under-tree and over-tree, irrigation, frost protection and cooling (including chilling)
 - Upright for field and greenhouse applications
 - Inverted for greenhouse and hoop house applications
 - Compatible with Leak Prevention Device (LPD)
- Recommended filtration 120 mesh
- Made of durable plastic for long term field operations – high UV resistance
- Nozzles are manufactured from wear resistant materials
- Clog resistant due to large water passages
- Even and uniform distribution of water and fertilizers

Technical Data

- Flow rates: 9.2 to 79.3 GPH @ 29 psi
- Recommended working pressure: 15 to 53 psi
- Required filtration: 120 mesh
- Wetted diameter: 8 to 35 feet

The following pages contain the technical information about the DAN Modular system.

Dramm Hozon Syphon Mixer

The syphonject draws a concentrated solution from a bucket through a flexible suction tube. The solution is then diluted as it enters the water stream at an approximate ratio of 20 parts water to one part concentrated solution. Requirements: A full flow nozzle 3-5 GPM., Minimum water pressure at faucet 35 PSI, max hose length of 50', any restrictions in the line downstream will cause backpressure and it will not work.

Controllers

DC Irrigation Controller

Features

- Operate one valve or up to four stations with sensor and master valve (four station) without AC power hookup
- Four button keypad with an integrated LCD display
- Easy to read AM/PM clock
- Independent programming for each valve (four station)
- Can operate two valves simultaneously (four station)
- Digital icon indicates station in operation (four station)
- Automatic, semi-automatic and manual operation
- Operates with R710DC latching solenoids
- Irrigation suspension override (rain mode)
- Master valve wires included with the four station model
- Withstand harsh climatic conditions - rated IP68, the highest attainable code classifying the degree of protection against water intrusion (completely sealed and waterproof)
- Mount to valve or valve box wall
- Powered by one 9-volt alkaline battery (not included) featuring low power consumption
- Program stored for up to 20 seconds during battery change
- Single station includes the solenoid

ITEM #	DESCRIPTION	PRICE
DG540	D/C Four Station	\$115.92
DG560	D/C Six Station	\$124.27
DG710	D/C Single Station	\$99.92

DC Valve

In-line Valve Features

- Internal bleed, does not have manual override for manual ON/OFF
- High flow with low pressure loss
- Rugged, reinforced self-cleaning diaphragm provides reliable operation even with contaminated water
- Flow control handle for water flow adjustment and manual shutoff
- FPT inlet x FPT outlet, 10 - 150 operating pressure

ITEM #	DESCRIPTION	PRICE
DG007	¾" • 0.1 - 28	\$48.05

DCSOL3	3 Wire Old Style DC Solenoid	\$31.30

AC 4 Station Controller

The Orbit 4-station swing door timer comes in a weatherproof cabinet with internal transformer for easy indoor or outdoor plug-and-go installation. Easy-Set Logic provides for headache-free programming.

Features and Benefits

- Indoor/Outdoor Mounting
- Easy-Set Programming Logic
- 3 Programs for flexible scheduling
- Large LCD and Dial

ITEM #	DESCRIPTION	PRICE
ORBAC4	AC 4 Station Controller	\$68.61

24 Volt AC Valve

In-line Valve Features

- Internal bleed, manual override for manual ON/OFF
- High flow with low pressure loss
- Rugged, reinforced self-cleaning diaphragm provides reliable operation even with contaminated water
- Flow control handle for water flow adjustment and manual shutoff
- Fipt, 10 - 150 PSI

ACSOL	AC Solenoid for the AC Valves	\$16.71

DC Battery Valves and Controllers

DC Propagation Controllers

Heavy duty plastic with DC latching solenoid for above controllers. All have FPT connections and operate at 10 to 150 PSI, have manual flow control valve and are normally closed.

ITEM #	DESCRIPTION	PRICE
DG71010P	Propagation Controller w/1" Valve	\$126.65
DG71075P	Propagation Controller w/0.75" Valve	\$118.19
DG710AP	Single Station Propagation Controller	\$107.23

Single Station w/ Valve

Completely waterproof, the 700 series has a long list of features, including 4 start times per valve per day water budget, AM/PM clock, watering duration from 1 minute to 12 hours, 7 day programming options, simple 4 button design and easy to read screen. Sleek and compact, the 700 series are only 4 1/4" H x 5" L x 3 1/2" W. Can be used to temperatures from 38 to 130. Uses AA batteries.

When ordering valves, please provide model # of your controller.

DG71020	2"	\$193.34

Garden Hose Controllers

Battery operated (9 volt battery) with FHT inlet and MHT outlet. 10-140 PSI. max flow is 5.2 GPM. Has 6 buttons.

ITEM #	DESCRIPTION	PRICE
DG9001D	Battery Op Garden Hose Controller	\$38.83

Pumps

Steps To Selecting a Pump

- Start with your desired PSI at the end of your line.
- Add PSI loss, use elevation conversion scale on page 109 to figure PSI loss per foot of rise
- Add friction loss per pipe type from page 110
- Add filter PSI loss, approx. 5-10 PSI
- Total would indicate what PSI you would need at the pump to irrigate

IPT Pump (6.5 HP)

IPT 2" Engine Driven Portable High Pressure pumps are cast aluminum construction with cast iron volute and male NPT ports. Pump applications include fire protection and irrigation. These pumps are available with a wide choice of standard and heavy duty gasoline or diesel fueled engines. These pumps feature high efficiency closed cast aluminum impeller. All models come equipped with EPDM/EPR elastomers and seals. Most models include a heavy duty steel roll frame.

Features

- Cast Aluminum Construction
- EPDM/EPR Mechanical Seals
- Optional Viton® Seal and Elastomers Available
- 2" Cast Iron Suction & Discharge Male NPT Port Sizes
- Maximum Flow up to 130 GPM
- Maximum Head up to 108 PSI
- Maximum Lift to 26 Ft.
- One Tool Serviceability
- Utilized for Fire Protection or Irrigation
- Discharge Port Rotates in 90° Increments
- Engine Options: Honda, Briggs & Stratton Gasoline or Hatz Diesel Engines

Water Filters

Triton® Sand Filter

The Triton II filter is the result of over 40 years of product evolution and refinement. It has set the industry standard for effectiveness, efficiency, long runs between service and providing years of dependable, low maintenance operation. The Triton II filter features a special internal design that keeps the sand bed level, ensuring even water flow and resulting in the most efficient filtration possible.

- Time-proven internal design ensures that all water receives maximum filtration for crystal clear results.
- GlasLok™ Process creates a one-piece, fiberglass-reinforced tank with a UV-resistant coating for years of dependable, corrosion-resistant service.
- Flow system design controls filtration quality and ensures maximum run times between backwashing to save you time.

2" or 3" Plastic Disk Filter

Disk filters are designed to clean dirty water for drip irrigation systems and handle up to 3 times more dirt and debris than screen filters, before cleaning is necessary. The design of the "disk" filter is a stack of disks pressed together. These disks have tiny grooves allow clean water to pass through. To clean the filter, remove the cover, loosen the stack of disks and wash between the disks; reassemble.

- Designed for use as a primary or secondary filter
- For use with water containing high amounts of organic or inorganic matter

ITEM #	PRICE
PDF020	\$131.56
PDF030	\$136.62

API Spin Clean Filters

These filters are used to clean water for drip irrigation systems. They clean well water, or relatively clean water and work especially well for filtering sand out of water. But they are not recommended for surface water containing algae. We recommend a pressure gauge on the filter inlet and outlet to determine when the filter is clogging and to avoid unnecessary cleaning. For drip irrigation tape, mesh size should not be coarser than 120 mesh. Mesh size over 175 create unnecessary filter cleaning and clogging. Filters are built from a high heat, chemical resistant glass-reinforced plastic and have a stainless steel screen. Made in USA.

MAX		10.5	25	75

Venturi injectors are a high efficiency, differential pressure injectors. The pressure difference creates a vacuum inside the body which results in suction through the suction port. These injectors are trouble free because they have no moving parts. Complete units similar to above have a brass check valve, brass gate valve, flow meter, pressure gauge, and a Mazzei injector unit with bypass, all mounted on a treated wood frame for a long life.

ITEM #	DESCRIPTION	PRICE
MICPC05	Suction Port Cap For Mazzie 384 & 584	\$3.72
MIC384	1/2" Model 384	\$42.83
MIC584	3/4" Model 584	\$42.83
MIC1078	1" Model 1078	\$66.10

Air Release Valve

Put in the highest point of the main line to help protect your fertilizer injectors from damage. Every drip tape system should have one of these in the highest point of the system to prevent drip tape from suctioning in dirty water when you shut off the water. If you shut off the water the lowest areas of a line are going to drain and the higher points are going to create a vacuum and try and suction in dirty water. These will prevent that and allow clean air to enter your tape instead of dirty water coming in through the drip tape slits.

Ironside Red Lay-flat Discharge Hose

Ironsides is similar to Sunflow but features high working pressure and resists kinking and twisting. Also sold by foot.

ITEM #	SIZE	PSI	PRICE
IRL015	1 1/2" x 300'	150	\$305.79
IRL020	2" x 300'	150	\$395.99
IRL030	3" x 300'	150	\$635.03
IRL040	4" x 300'	150	\$973.43

Lay-flat Discharge Hose

Lightweight, tough and economical water discharge hose great for running water to the field. It's used for mainlines in drip irrigation or transferring water. Hose rolls up in a nice flat coil. It is very popular because it will not rot or mildew and coils flat for storage.

ITEM #	SIZE	PSI	WEIGHT	PRICE
LAY015	1 1/2" x 300'	80	#48	\$125.49
LAY020	2" x 300'	80	#69	\$135.37
LAY030	3" x 300'	70	#117	\$273.11
LAY040	4" x 300'	70	#156	\$398.79

Suction Hose

This suction hose may not be the cheapest but it is a high quality hose that will not collapse. Comes on a 100' roll but we will cut to length.

ITEM #	SIZE	PRICE	100+
TIG015	1 1/2"	\$3.43	\$3.09
TIG020	2"	\$3.98	\$3.58
TIG030	3"	\$6.97	
TIG040	4"	\$12.36	

Orchard Tubing

Orchard tubing is similar to the Oval Hose but is mainly used in greenhouse applications. However, it can hold more pressure than the Oval Hose. This is a lateral distribution & supply hose for on-line drippers, weighted drip tubes, micro-sprinklers and can be used as a headline for small drip tape systems.

ITEM #	SIZE	PSI	WEIGHT	PRICE

irritec *TAPE* PREMIUM LIGHT DRIPLINE

- Premium Light Dripline with Seamless Construction
- Manufactured with Engineering Grade Polyethylene Resins for High Strength
- Two Stripes for Correct Installation
- Highly Uniform Water Distribution with a Cv of <2.0%
- Continuous Labyrinth with Integrated Inlet Filter for Additional Clogging Protection
- Laser Drilled Outlet Reduces Root Intrusion and Siphon Plugging

Characteristics and Advantages

- Two stripes identify the dripline side with the exit holes ensuring correct installation.
- Target markets include row crop (surface, subsurface and under mulch), open field and greenhouse.
- Excellent choice for close dripper spacing, low application rates and extended performance in the field.
- The integrated inlet filter and extra large cross section provide plugging protection.
- Laser drilled dripper outlet prevents root intrusion and siphon plugging.
- Exceptional filtration performance extends the range of usable fertilizers.
- A lower Cv, <2% results in highly uniform water distribution.
- Less susceptible to damage during installation and easily retrievable.
- UV resistant and resistant to common fertilizers.
- Recommended filtration: 200 Mesh for .07 GPH and .09 GPH
150 Mesh for .14 GPH, .21 GPH and .28 GPH

Apex PC Heavy Wall Dripline

- Pressure compensating dripper is non-CNL and has the largest filtration area in its class
- resulting in superior clog resistance.
- Wide pressure compensation range of 7 to 60 psi.
- Excellent water distribution uniformity - from the top to the bottom of the row, every plant
- gets the same amount of water.
- High quality resins assure durable performance and long life.
- Dripper has a chemical resistant silicon diaphragm and MDPE body.
- Ideal for permanent crops such as nut trees, fruit trees and vineyards.
- Seven year non-prorated warranty against defects in materials or workmanship.
- Coils are rolled tight and consistent for easy installation.
- A Cv less than 5% allows design flexibility for surface or subsurface applications.
- Resistant to UV, common fertilizers and environmental stress cracking.
- Recommended filtration: 120 Mesh for all flow rates
- 18 MM, .55 GPH per dripper

BTF Low & Medium Flow 6" Drip Spacing

Unlike other tapes, Chapin Tape has a unique extruded film profile with extra strength and thickness where it is needed most: the rounded tape edges that increase resistance to abrasion and insect damage.

All Chapin turbulent flow paths have larger internal dimension, providing extraordinary resistance to clogging. Chapin drip tape consistently supplies the narrowest manufacturer's variations (CVs) in the industry for unmatched uniformity.

In addition, carefully controlled lower tension winding on reels results in easier installation thanks to less retraction, kinking and snaking in the field.

With decades of proven performances, a wide variety of flow rates, wall thicknesses and outlet spacings, Chapin drip tape provides consistently outstanding performance for the most demanding applications.

Note: Remember not to lay drip tape under tension, as stretching could occur, resulting in a damaged emitter.

Developed to our specifications. Longer runs and better uniformity than any other drip tape at 4" or 6" spacing!

Mulch Bed Layers

Rain Flo2470 Raised Bed Plastic Layer

- Will lay 4' plastic, 30" bed top, with minimum 58" row spacing
- Adjustable 3" to 5" bed height
- Requires minimum 30-hp with 4-wheel drive
- 50 gal. water tank to adjust weight to match tractor size
- Compact machine for high tunnels and small tractors
- Adjustable tension brake on plastic roll carriers
- Replaceable, reversible plow shares
- 3/8" & 1/2" UHMW poly lined bed press
- Category 1 or 2 - 3-point hitch

Options

- Optional single or double drip applicator
- Optional center fillers, for heavy soil
- Optional crowned bed available

ITEM #	PRICE
RAI2470	\$3,875.00

Rain-Flo 2570 & 2670 Raised Bed Mulch Layers (Series II)

2570 Mulch Layer W/ Auto Ro-Track

- 60" row centers with 4' plastic, 60 hp FWD minimum
- Adjustable plastic width from 3 ft. or 4 ft. wide plastic
- Adjustable bed height from 3" to 7" high bed
- On the go cover disk adjustment
- Adjustable brake tension on plastic roll carriers
- Bed press has adjustable side press plates
- With operator seat
- Adjustable row marker
- Replaceable, reversible plow share blades
- UHMW (replaceable) poly lined bed press
- Spring loaded shovels on side, help loosen soil for cover disk
- Category II, 3-point hitch

Options

- Automatic steering correction (Ro-trak) for hill sides
- Hydraulic cover disk adjustment
- Single or double drip attachment
- Crowned bed press for level fields
- Center fillers, to help fill center of bed
- 400 lb. Stainless steel ground driven fertilizer hopper
- Fumigation tank mounts with gas knives

- Spring loaded shovels on side, help loosen soil for cover disk
- Category II, 3-point hitch

Options:

- Automatic self steering Ro-trak for hill sides
- Single or double drip applicator
- Crowned bed press for level field
- Center fillers, to help fill center of bed
- 400 lb Stainless Steel ground driven fertilizer hopper
- Fumigation tank mounts with gas knives

Description:

- Manual without Auto Ro-Trak deduction
- Drip attachment
- Double drip attachment
- Center of bed fillers
- Crowned bed
- Dry fertilizer hopper, 400 lb ground drive

Rain-Flo Flat Bed Mulch Layer

- Will lay 3' - 5' plastic; minimum 58" row spacing
- Requires minimum 35 hp with 4-wheel drive
- On the go cover disk adjustment
- Has extra plastic roll carrier
- 16" cover disks with dirt shields
- Compact machine has category I, 3-point hitch
- Lays clear plastic over sweet corn
- Has adjustable row markers
- Adjustable tension brake on plastic roll carriers.
- Independent disk and press wheels

Options

- Optional depth wheels (for sweet corn)
- Optional single or double drip applicator

Black Poly Expert Plastic

This plastic is Poly Expert's blown embossed plastic mulch. This plastic will not hug the bed quite as good as cast film, but where it shines is in plastic removal after the season. It is a very stretchy film and is strong to resist tearing. **The 1 mil thickness is equal to most 1.1 mil plastics.**

ITEM #	LENGTH	MIL	PRICE	16+
BE44	4' x 4000'	1	\$126.80	\$123.00

Agricultural Film Division of SIGMA Plastics Group

Black Micro-embossed Film

A general-purpose mulch with superior weed control and warms the soil to give plants a quick start, giving high yields in quality crops. Retains moisture and works exceptionally well in a variety of climates and soils.

- This film is hot embossed and a softer film that stretches nicely over the bed.
- A reinforced and highly durable cast embossed film.
- Blocks weeds and prevents soil coming in direct contact with fruit and green vegetable.
- Cleaner produce, which means a higher market Price.
- Works exceptionally well in a variety of soil types and climates.
- This mulch is wind resistance and elastically, which makes it easier to apply and remove.

Reyfilm Bio – Biodegradable Mulch Film

Embrace the Future with Biodegradable Mulch Film!

Benefits:

- Effective: Same benefits of traditional poly mulch in a fully biodegradable format. Unlike traditional plastic mulch, biodegradable alternatives break down naturally in the soil.
- Zero plastic waste: biodegradable mulch eliminates the need to remove and dispose of mulch film at the end of the cycle.
- Cost-Efficiency: bio mulch is a cost-effective choice for forward-thinking farmers. Save on labor, time and money by eliminating mulch retrieval, tractor fuel and disposal costs.

Thanks to the versatility of the characteristics offered by the REYFILM BIO mulch family, these mulch films can be used in different environmental conditions, for numerous types of crops and at different times of the year. The recommendation and selection for each type of product will depend on these factors.

The duration of mulch in the field depends largely on environmental factors (rain, temperature, radiation and activity of soil microorganisms). In general, reyfilm bio products in 15 microns (0.6 mil) are used for cultivation cycles of 2 to 6 months, and for crops lasting 9 to 12 months, thicknesses of 18 to 20 microns (0.8 mil) are recommended. Finally, for crops that require durations longer than one year, thicknesses of at least 40 microns are recommended. Reyfilm Bio has more than 15 years of monitoring usage and degradation in a multitude of crops such as tomato, pepper, lettuce, asparagus, melon, watermelon, etc.

Reyfilm Bio → CO₂ + H₂O + biomass

RainFlo™ Model 1670 Water Wheel Planter

Features

- Approximate tractor size: 50 to 70 hp
- Will plant 60" row spacing (minimum)
- Field ready with one planting wheel
- Plants bare roots, pots, and plugs
- Capability of 8" to 36" row spacing and one to four planting wheels (Standard)
- Two 80 gallon tanks
- 18 tray capacity, 24 with top tray
- Quick change planting wheel setup
- Easy adjustment for comfort on seat and foot rest
- Large tires with highway bearings
- Side valve for washing hands
- Galvanized expanded metal trays

- Optional top tray
- Optional 3 and 4 seat with trays
- Optional trailer\3-point combination
- Quick fill (2" quick coupler connection)
- Top Tray
- Side Ladder
- Extra Seats With Extra Shelf Each
- Planting Wheels: 12, 15, 18, 24, 30, 36, 48 &
- Custom Size. Standard Spike is C.
- Wheels not standard spacing or spikes

Options

- Optional super wheel (spike changes to multiple sizes and spacings)
- Optional side ladder

Electric Sprayers

403 Home & Garden One-Hand Sprayer, 1.25 Liter

Lightweight and versatile, these sprayers are perfect for general, at-home spraying both indoors and out, weed control, gardening, auto and marine, livestock applications and more. All offer many of the same features as our larger, professional sprayers.

HIGHLIGHTED FEATURES

- Chemical-resistant seals for use with pesticide.
- Large pump knob.
- Plastic adjustable nozzle.
- Pressure relief valve.

421 Multi-purpose Chest-mount Spreader

Designed for spreading a variety of granular material over irregular terrain, this chest-mount, extremely portable precision spreader is perfect for use in decorative beds with fertilizers and insecticides. Ideal for lawn maintenance, treating parking lot islands, as well as deer plotting. Eliminates banging over curbs with cumbersome wheeled units. The 421 spreader is also effective in spreading ice melt, oil absorbents and seeds.

HIGHLIGHTED FEATURES

- Fingertip levers control direction and volume.
- Comfortable cross-shoulder strap.
- Fully enclosed gearbox is corrosion resistant.
- Large opening allows easy filling and cleaning.
- 20-lb.-capacity hopper with cap protects operator from chemicals and dust.

425 Solo Backpack Sprayer

Rugged SOLO® backpack sprayers are flexible and ergonomically designed for virtually any spraying task both large and small with Fertilizers, Insecticides, Fungicides, Herbicides, Pest control, Disinfectants Built for comfort. Built for convenience. Built to last. SOLO's ergonomic design contours to your back for greater comfort. With a proven piston pump, you will be reliably equipped for applying spray liquid or insecticides in your garden. A low number of wearing parts and sturdy technology ensure a long service life and minimum maintenance. The SOLO® 425-101, with a connecting rod-actuated piston pump, can produce a wide pressure range of up to 90 psi and is capable of performing virtually every spraying task. Easily and effectively handles liquid disinfectants, fertilizers, herbicides, pesticides and formulations for tree, shrub and plant protection.

HIGHLIGHTED FEATURES

- Designed with professional features throughout.
- High-performance piston pump for increased pressure capabilities of up to 90 psi.
- Extra-large carrying handle with wand retainer for easy portability and storage. Deluxe shoulder straps and waist belt for user comfort.
- Rugged metal frame for stability when filling.
- Extra-large tank openings for easier filling and cleaning.
- 28" Unbreakable wand and shut-off valve for excellent reach.
- Commercial shut-off valve with lock-on/lock-off feature to minimize user fatigue.
- Viton® seals in key locations ensure long service and durability.
- Fold-away handle with wand retainers for easy storage and transport
- 48" nylon-reinforced high-pressure hose for extended reach.
- Double filtration system: filter basket and nozzle filter.
- Upgraded four-nozzle assortment for multiple spraying tasks: durable, professional grade, brass adjustable nozzle; fan spray; hollow cone; and jet stream nozzles. Tee Jet® compatible.

SOL425101	\$93.64

466 MIST BLOWER

The new Solo 466 Mist Blower is ideal for applying plant protection chemicals, or for mosquito, pest and parasite control in storage areas, containers, or animal herds.

It is particularly popular in vector control especially in subtropic and tropic regions due to the new ULV nozzle 49480 that produces very fine droplets, applying chemicals over large areas more efficiently than manual spraying.

The striking design of the mister fan housing integrates all functional components such as starter, fuel tank, spark plug, air filter and carburetor and provides the SOLO 466 Mist Blower with an unmistakable appearance.

HIGHLIGHTED FEATURES

- New high-performance, low emission 66.5 cc 2-stroke engine to generate a fan air volume of max. 824 cfm for total plant penetration.
- Aluminum crankcase and high quality engine components for increased power output even under high temperature operating conditions.
- Increased engine performance converts to higher misting performance.
- Improved fuel efficiency and reduced emissions with modern engine technology and catalytic converter.
- Large 0.37 gallon capacity fuel tank combined with low fuel consumption allow long operating periods.
- Easy starting, fuel pump assisted.
- Effective vibration dampening.
- Single multi-function operating handle for throttle, spray volume and start/stop.
- Efficient air filtering system, easy to maintain.
- Ergonomically shaped and padded tank frame, comfortable, wide, padded shoulder straps and large, padded hip belt for superior operator's comfort.
- Compact size, low weight.
- Sturdy frame with integrated carrying handle and stand.

SOL466	\$647.64

456 Professional Handheld Sprayer, 2.25 Gallon

These extremely heavy-duty sprayers will stand up to the toughest of jobs. Suitable for plant protection chemicals, pest control solutions and many other uses.

HIGHLIGHTED FEATURES & BENEFITS

- Viton® seals in key locations for durability and safety with a wide variety of chemicals.
- Large base for added stability. 458 model can accommodate the wheel set and pull handle (accessory kit, part # 49211).
- High-density polyethylene (HDPE) tank with ultra-violet inhibitors; will not dent, crack, or corrode.
- 48" nylon-reinforced hose for extended reach.
- Large piston pump pressurizes the sprayer as much as 50% faster than competitive sprayers.
- Automatic pressure relief valve releases pressure at 45 psi and may be used to release pressure manually when desired.
- 28" unbreakable wand and commercial shut-off valve assembly.
- Four-nozzle assortment for multiple spraying tasks: plastic adjustable, fan spray, hollow cone, and jet stream nozzles. Accepts Teejet® type nozzles.
- 4.5" opening allows easy filling and thorough cleaning.
- Extra large pump handle with built-in wand retainer for convenient carrying and pumping while wearing gloves.
- Commercial shut-off valve with lock-on/lock-off feature reduces user fatigue.
- 5-year commercial warranty against defects in material and workmanship.

475 Professional Backpack Sprayer

Built for comfort. Built for convenience. Built to last. SOLO's ergonomic design contours to your back for greater comfort. A low number of wearing parts and sturdy technology ensure a long service life and minimum maintenance. The large filling aperture for convenient filling of the tank and smooth-running pump make spraying pleasant work. The SOLO® 475-101 is capable of producing up to 60 psi, with its rugged connecting-rod-actuated diaphragm pump. The diaphragm is made of top quality material for its resistance to harsh chemicals and its long life expectancy. Designed with the ability to pass small abrasive particles without damage to the pump assembly. The diaphragm pump is ideal for handling chemicals in wettable powder form, as well as liquid formulations.

HIGHLIGHTED FEATURES

- Designed with professional features throughout.
- High-performance diaphragm pump for use with wettable powders, liquid and bleach solutions. Passes small abrasive particles without damage to the pump assembly. Produces pressure of up to 60 psi.
- Extra-large carrying handle with wand retainer for easy portability and storage.
- Deluxe shoulder straps and waist belt for user comfort.
- Rugged metal frame for stability when filling.
- Extra-large tank openings for easier filling and cleaning.
- 28" Unbreakable wand and shut-off valve for excellent reach.
- Commercial shut-off valve with lock-on/lock-off feature to minimize user fatigue.
- Viton® seals in key locations ensure long service and durability.
- Fold-away handle with wand retainers for easy storage and transport
- 48" nylon-reinforced high-pressure hose for extended reach.
- Double filtration system: filter basket and nozzle filter.
- Five-nozzle assortment for multiple spraying tasks: durable, professional grade, brass adjustable nozzle; plastic adjustable; fan spray; hollow cone; and jet stream nozzles. Tee Jet® compatible.

SOL475	\$96.48

441 Battery-Operated Backpack Sprayer

Ideal for a variety of medium-to-large spraying jobs at home and on the farm, including general spraying, weed control, and gardening. Achieve optimal spraying coverage minus tiresome pumping with the 441's robust, lithium-ion battery..

HIGHLIGHTED FEATURES

- Speed Tip Nozzle: multi-spray pattern. Sprays with 3 different settings with a turn of the dial: jet stream, flat spray and full cone mist.
- 4 gallon, UV-resistant HDPE tank with large 4.75" opening. The large filter basket is easily removed.
- 11V diaphragm pump, 37.5 PSI
- 11V Lithium-ion Battery. 2.5 hours running time. 2-hour charging time
- Integrated carry handle for easy transport and maneuvering.
- Adjustable padded straps.
- 20" unbreakable wand provides excellent reach. The wand can be stored neatly in a wand holder, protected from dirt or damage by a special opening integrated in the tank base.
- Commercial shut-off valve with lock-on / lock-off feature reduces operator fatigue.
- 48" nylon reinforced high-pressure hose for extended reach.
- Stable tank base ensures that the sprayer will not tip over when filling.

Equipment Available in

Stainless Steel or Painted Finish

Our entire product line (except for the Water Tanks) are available in both painted or T304 stainless steel (#4 polish finish). Water Tanks are only fabricated from stainless steel. Stainless equipment is solely stainless except for motors, gearboxes, sprockets, roller chain as well as some accessories. These items are also available in stainless upon request.

RBC RECEIVER BELT CONVEYOR

The smooth white rubber conveyer belt slowly feeds produce into the Washer (Brusher). This unit is normally powered by the Washer but can also be powered with it's own variable speed gear motor.

- 4' - Standard unit length
- 6' - 8' length is recommended if used with a Bin-dumper

CUSTOM Lengths available

- Standard belt height is 32" to 38".
 RBC1604 = 20" W x 48" L
 RBC2404 = 28" W x 48" L
 RBC3204 = 36" W x 48" L

Conveyors

Aluminum Harvesting Conveyor

Aluminum conveyor is designed for harvesting vegetables including: melons, sweet corn, pumpkins, broccoli, cabbage and cauliflower.

- Great for packing in bins, boxes or loose on the wagon. Mounts left or right and anywhere from front to rear of a regular farm wagon.
- Stand is 16" high and sits on one edge of the wagon. Opposite end clamps to wagon with two adjustable chains & C-clamp.
- 3.5' long fiberglass receiving and grading table.
- 3/4" PVC cleats on belt. Belt travels approximately 50' per minute.
- UHMW conveyor bottom for extended belt life.
- Easily put on or taken off in minutes.
- Includes two 20' long 3/8" hydraulic hoses and a low speed, high torque hydraulic motor.
- Painted aluminum side prevents discoloration of produce upon contact with side.
- Optional: Drop lid: removable lid allows produce to fall directly into crates, bins or boxes.
- Gasoline engine: for use with horse drawn wagons or where no hydraulic is available.
- **Now comes with a winch on the wagon end so you can adjust the other end up or down depending on your height desires.**

Please note: there is a 5% crating & handling charge if shipped. May not be in stock all the time...please call before picking up. Don't forget - you need a track row every eight rows of produce.

Mulch Lifters

Rain-Flo Challenger 1800 Mulch Lifter

Standard Lifter - Auto-Reset Lifter

After your vegetable crop is over, the Challenger is designed to retrieve the plastic mulch to the surface of the ground. Will lift any plastic 36" to 60" with fast and easy adjustments. Lifting plows use standard Case IH 18" deep suck shears. To keep from clogging, the machine has three spring loaded trash and vine cutting disks and depth control wheels for constant depth control. Durable construction with 5/8" shear bolts (Auto reset is optional and recommended for rocky fields). This year, hitch to a Challenger and let it do the work!

Call us about renting one before buying to see for yourself.

- Approximate tractor size: 55 to 100 hp
- Will lift plastics from 3 ft to 5 ft wide with fast and easy adjustments
- Has two spring loaded trash and vine cutting disks
- Removable center disc to cut plastic in middle
- Heavy shanks have 5/8" safety shear bolts. Auto-reset is optional
- The Challenger is built to last and make your job easier.

Mesh Bird Netting 17W & 42W

Easy ON and Easy OFF! Easy Fit's patented locking square mesh design is a snap to install and comes off easily. Square meshes lock in length and width ensuring proper installed dimensions every time. And when it comes time to harvest, simply retract the netting and store out of the sun in a dry, ventilated location and you'll be all set for next year. Easy Fit is perfect for hobby and weekend growers who plan on installing smaller volumes of net by hand or for large commercial operations that require a seasonal net that drapes well on support structures. Perfect for use as vineyard netting and blueberry netting, AviGard Easy Fit works 24/7 to keep birds out and lock fruit flavor in.

Trellis Netting Net

Trellis Netting is a strong and versatile polypropylene mesh designed for growers as a gentle and more efficient support which helps increase yields by providing greater exposure to sunlight and air circulation for climbing vegetables as well as a support for flowers. Due to its durability and practical natures, Trellis Netting is now being used by many agriculturalists and floriculturists. It is available in a variety of widths and mesh sizes and is easy to handle and install. Trellis Netting fully satisfies the requirements of a variety of growing techniques, both vertical and horizontal. The variety of sizes makes it ideal for either home gardeners or commercial growers.

BENEFITS

- Reduces installation labor costs
- Is inexpensive, rot and rust proof
- Provides better exposure to light and air
- Is aseptic, reducing pesticide costs
- Is resistant to UV rays and chemical agents
- Maximizes cultivation density
- Results in higher crop yields

NEW Item

The ProtekNet

The ProtekNet 25 gram insect net offers a complete crop protection against insects. The 25 gram mesh is the most popular solution against most insects and is suitable for all types of production.

Very versatile, it can be used in the field, large tunnels or greenhouses. The net can be installed directly on the plants or hoops for better results. This is a clear netting and has a light transmission of 89%

- Complete exclusion insect control netting for your crops.
- Highly effective against insects and birds.
- Minimal thermal effect, so it can be laid during summer time.
- Protects crops against weather damage.
- Run-resistant fabric.

Insects That the Netting Keeps Out

- Aphids
- Armyworm
- Brown Marmorated Stink Bug
- Cabbage Root Fly
- Carrot Rust Fly
- Chrysomelid
- Corn Borer
- Flea Beetles
- Japanese Beetles

EC Meter

Features at-a-glance

- Waterproof
- Fast Automatic Temperature Compensation with exposed temperature probe
- Graphite sensors that reduce polarization effects
- 0.5 (500 ppm) and 0.7 (700 ppm) selectable EC to TDS conversion factors
- Single point automatic calibration using Quick Cal standard or 1.41 mS/cm in standard calibration mode
- 250 hour battery life

The HI98318 is our latest pocket meter for measuring the EC/TDS of a hydroponic nutrient solution. It is only 0.7" thick, fitting comfortably in your hand. The meter has a button for turning the meter on/off and another button for automatic one point calibration.

Automatic calibration is achieved easily. Simply submerge the sensor in calibration solution and the meter will automatically detect the calibration standard (5.00 mS/cm in Quick Cal mode or 1.41 mS/cm in standard calibration mode). Temperature is automatically compensated for with the integrated temperature sensor.

- High accuracy with 0.01 pH resolution
- Two point fast and accurate calibration
- Usable with virtually any electrode that shares the same connector
- 3000 hours of battery life
- HI 1270 small diameter probe fits easily into a test tube

Untreated White Oak Wood Stakes

This quality stake can be used for several seasons. These untreated stakes are AIR DRIED white oak stakes. Air dried stakes have a lot of benefits over green stakes. They will not turn black from mold when stored, stay straighter in the field and are lighter in weight. Try some quality, air dried, stakes for yourself to see the advantages.

What is most important when you want to purchase a product? Exactly, a good product for a good Price, good service from the producer and a satisfied feeling.

Guarantee

Metallo Tools provides 10 years of guarantee and spare parts for all products. [Read more.](#)

Pointed Pruner

Description: The pointed pruner works well to get into hard to get to areas to trim and will cut through up to 1/2" growth.

ITEM #	PRICE
METK0060	\$25.17

Pruner w/SK3 Steel Blade

Ergonomic design with squeeze to unlock feature. Blades are high carbon steel, hard chrome plated. Handles are aluminum to keep the unit light in weight. Cuts up to 3/4" diameter material. Spare parts are available.

ITEM #	PRICE
METK0600	\$29.88

Pruner w/sk3 Steel Blade

Designed for a large hand. Forged steel design, cutting blades made with high carbon steel, hard chrome plated, aluminum handles with easy grip coating a two position lock system and ergonomic design. The upper blade is replaceable. Cuts material up to 1" in diameter.

ITEM #	PRICE
METK0500	\$28.14

Lopper w/Wooden Handle

Classic wooden handle bypass lopper. The blades are made of high carbon steel so they hold a sharp edge longer. The wooden handles have a built in rubber bumper stops to reduce shock load to hands and wrists while cutting. The overall length is 27.5" and the weight is just 2.7 pounds.

ITEM #	PRICE
METK5600	\$39.07

Pruner w/SK5 Steel Blade

Ergonomic design with squeeze to unlock feature. Blades are high carbon steel, hard chrome plated. Handles are aluminum to keep the unit light in weight. Cuts up to 3/4" diameter material. Spare parts are available.

ITEM #	PRICE
METK0050	\$28.14

Solingen Knife w/Orange Handle

A very sharp, inexpensive produce cutting knife. Can be sharpened or just dispose to prevent spreading of diseases from one field to another. We have customers that use them for butchering, harvesting produce, or any other job on the farm.

ITEM #	PRICE
MET956019	\$1.28

Heavy Duty Pruning Scissors, Orange Handle

This scissors has a long pointy blade designed for multiple uses. Perfect for harvesting fruits and vegetables.

ITEM #	PRICE
METK0040	\$14.67

Pruner w/SK3 Steel Blade

Designed for a medium size hand with a one position lock system. Forged steel design, cutting blades made with high carbon steel, hard chrome plated with aluminum handles with an ergonomic design and a special easy grip coating. The upper blade is replaceable. Cuts material up to 3/4" in diameter.

ITEM #	PRICE
METK0400	\$27.20

Curved Hand Held Pruning Saw

Folding handle, professional grade, curved blade pull saw designed with a one button system for easy opening and closing. Saw blades are high carbon steel, hard chrome plated with hardened teeth using an impulse hardening process for long lasting sharpness. The saw has a coated grip and weighs only .6 pounds. The blade is 7" long, closed length is 9.5" and the overall length when open is 16.4". Replacement blades are available. Spare parts are available.

Poly Frame Polycarbonate Hot Bed

ITEM #	DESCRIPTION	PRICE
STOHOTBE	Poly Frame Polycarbonate Hot Bed	\$341.82

Vegetable Seed Planter

This is a max emerge 2 row vacuum planter set up for sweet corn. The vacuum is either run by a DC/AC inverter run off the tractor battery or a hydraulic pump run off of the hydraulic system. The vacuum planter is a lot more precise and accurate in seed placement for better population than a finger pickup. This planter can be set up for no till, liquid fertilizer, or set up for various other produce crops. We need to know what seed you are using then we can get the right plate for the job. If you need a custom planter we could set one up for your exact needs.

TATER Rip Tandem Plow

Adaptable & Adjustable for planting, hilling, and harvesting.

The TATOR Rip has two plow shanks to give you the adaptability you need to work with potatoes, sweet potatoes, carrots, peanuts, and other underground crops. Use both shanks for planting, hilling, and harvesting, or you may wish to use only one shank during harvest.

Bigger Plants Bigger Yields!

More support, healthier plants, more produce

Plant Support System

When growing all types of plants, one thing they all have in common is to give the plant the support it needs to produce more fruits and vegetables. Why this is important, as the plant grows it is producing heavy fruits that pull the plant downward. When you give it the support it needs it's going to redirect the energy back into the plant and produce more fruits. Versus having to try and keep itself upright and produce fruits. Also helps eliminate mold and fungus on the plants.

EZ Step-In Post

ITEM #	DESCRIPTION	PRICE
EZSIP60G	60" EZ Step In Posts • Alpine Green	\$12.95
EZSIP60O	60" EZ Step In Posts • Sunset Orange	\$12.95
EZSIPG	80" EZ Step In Posts • Alpine Green	\$13.95
EZSIPO	80" EZ Step In Posts • Sunset Orange	\$13.95

8 Inch Ring

10 Inch Ring

12 Inch Ring

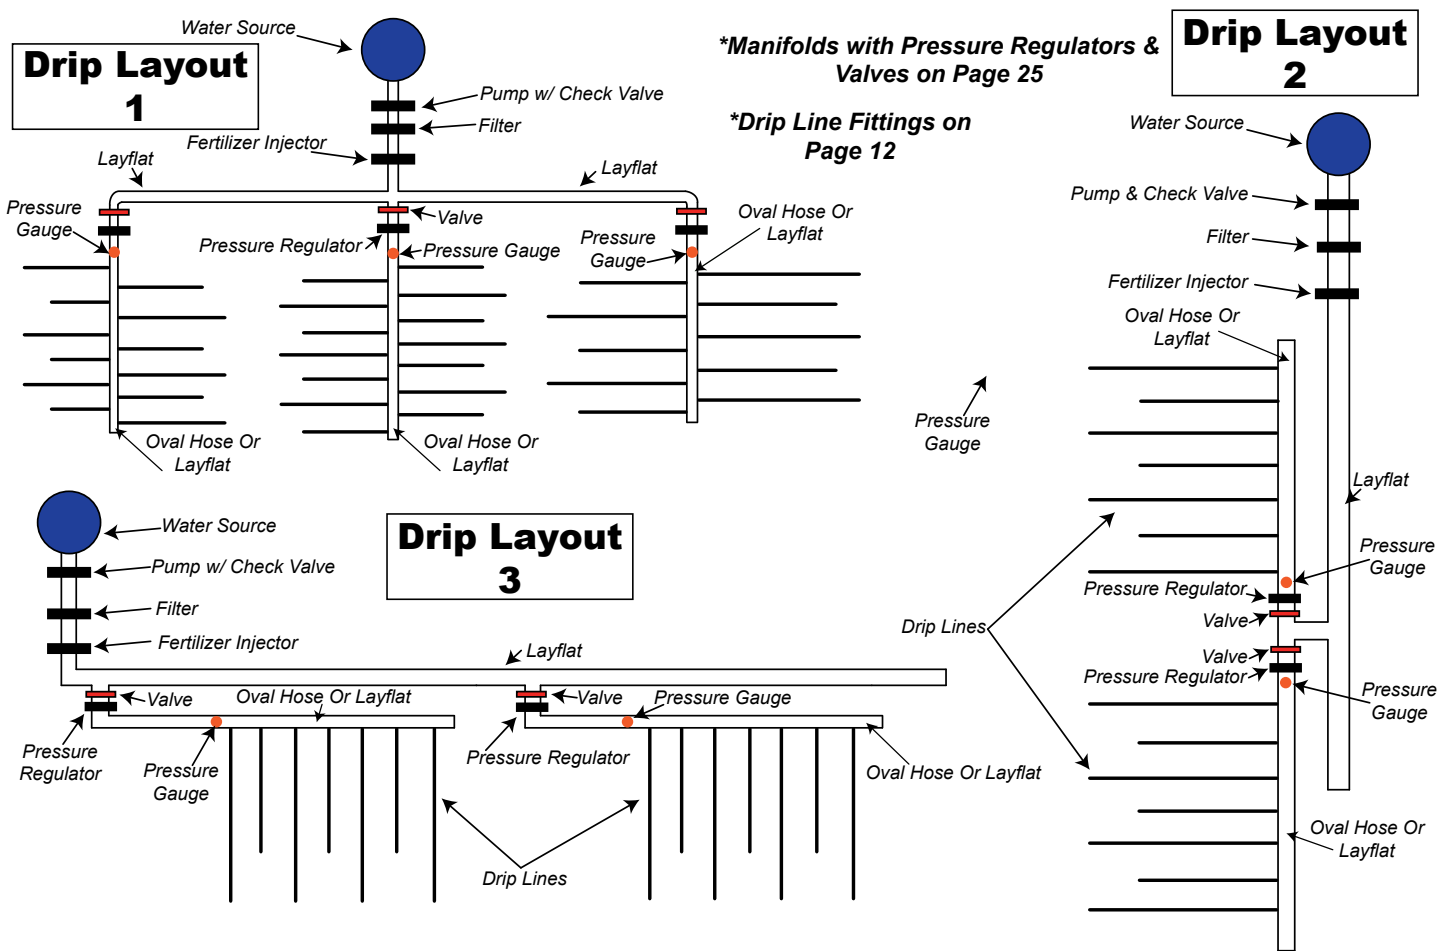

Features of the EZ Rings

- Add additional rings at any time without damaging the plant
- Adjustable up or down
- Rotate 360 degrees to accommodate the plant's needs
- Rings can be turned upside down and attached to the rod clamp for heavier support
- Easy to clean and disinfect from mold and fungus
- Compact for storage
- Rings were designed to have a bigger radius for the plant to rest on versus the wire cages that will cause damage in high wind and rain storms
- If the rings sag simply rotate them every other year and the rings will go back to the same shape as it was molded
- The more support the plant receives, the more fruits the plant will produce and the healthier the plant becomes

HANDY ELEVATION SCALE. CAN ALSO BE USED FOR WELL DEPTH.

SURFACE WATER CHLORINATION

For best results; if using surface water, you should chlorinate your system every two weeks. Inject approximately ½ Gal. chlorine bleach per acre. Run system about 20 minutes then let set for ½ day before irrigating again.

Square feet per acre = 43,560 sq. ft.
 1 Acre = 208.71 ft. sq.
 1" an Acre = 6,500-13,500 Gallons (Drip irrigation depending on row spacing)
 1" an Acre = 27,154 Gallons (Overhead Irrigation)
 1" per hour an acre = 452.57 GPM (Overhead Irrigation)
