TABLE OF CONTENTS

Most equipment and pumps have a two year warranty. Warranty is provided directly from the manufacturer to you as the customer. Please contact the manufacturer to claim a warranty.

Product specifications and availability are subject to change without notice and substitute items may occasionally be shipped.

We recommend you to mail, or fax your orders in a minimum of two weeks before you pick up them up, or need to be shipped. We reserve the right to pro-rate items in short supply. **Prices are not guaranteed.**

Early orders placed and not picked up by Feb. 15 will be subject to available supplies and updated Prices.

Order onion sets early and pickup on or before our indicated pickup date to avoid spoilage.

Returns policy: Salable products in their original packaging may be returned with permission. (10% restocking charges apply). **Note: Seeds, onion sets, fertilizer, special order items, and discounted items not returnable under any condition.**

All claims for damaged and missing items on a order MUST be made within 5 days from receiving the shipment. A signed proof of deliver noting the damage or missing items must be included. We will not be honoring any claim issues after the 5 days. This would also apply to any orders picked up at our warehouse, customer is required to verify all items on the order within 5 days.

Mesh Produce Bag

These versatile mesh produce bags find uses around your farm and market. Harvest, transport, market, and store items like apples, onions, peppers, potatoes, and sweet corn. Sturdy mesh allows customers to see produce at market, while bags make transport and organization easy for you. Breathable mesh allows storage crops like onions, potatoes, and perennial bulbs to release excess moisture. Since bags hold up in water, they are ideal for soaking and rinsing harvested greens, peppers, or root crops. Each woven poly bag has a built-in draw cord that quickly closes the bag and acts as a handle for transport.

Row Cover

Row Cover protects against cold temperature, frost, wind, insects and birds including whitefly. Ideal for packing out earlier (or later-fall) quality produce. This unique non-woven fabric has remarkable tear resistance, and is U.V. stabilized. Allows majority of the light to reach the crops, which provides ideal day and night time cover protection.

- Light weight to gently protect young plants without crushing.
- Protects against light frost. Raises soil and air temperature by several degrees F.
- Earlier Planting.
- Earlier or Later harvests.
- Accelerated Growth & Higher Yields

Potatoes

Yukon Gold

Mid-to-late season · Yukon Gold is a large variety of potato most distinctly characterized by its thin, smooth eye free skin and yellow tinged flesh. Unlike some other potato the Yukon Gold can stand up to both dry heat and wet heat cooking methods. Its waxy moist flesh and sweet flavor make it ideal for boiling, baking and frying but these potatoes will also withstand grilling, pan frying, and roasting.

Reba

Mid-to-late season · Excellent flavor--one of the highest rated in taste-tests Good for baking (not too dry, not too moist), potato salads, boiling, mashing, chipping. Bright white flesh. Shape: Round to oval to oblong. Skin: Smooth, bright white to buff colored.

Kennebec

Mid-to-late season · A popular all-purpose potato with smooth skin and texture, and white flesh that resists late blight and yields heavily at midseason. The Kennebec potato is a high-yielding, fast growing, widely adapted and vigorous potato variety with excellent storage qualities. Not only is it sold as a fresh market potato, it is widely distributed for processing as frozen fries and potato chips.

Eva

Mid season · Bright white skin and white flesh with texture a little mealy lend these tubers to mashing, baking, and homemade chips! Excellent storage. Resistant to golden nematode, common scab, viruses, early blight and hollow heart. Does everything well in the kitchen and has good flavor.

Lehigh

Late season · A great all-purpose potato: good for baking, mashing, boiling, frying, home-fries and they make a mean potato salad. Potato growers found that Lehigh offered consistently high yields across very diverse growing regions. These round to oblong, slightly flattened tubers with appealing yellow flesh provide good flavor. Resistant to blackspot bruise; tolerant to scab.

Red Norland

Early-midseason · Selected for richer red skin color. Round to oblong tubers have white flesh, store well, and are excellent for boiling. The "Red Norland" potato is great for cooking, very healthy and easy to grow! Very good for boiling and salads. Good for frying, roasting, and French frying. This is an outstanding red potato that offers both great flavor and heavy yields.

Red Pontiac

A mid-season variety · Offers sweet, solid white flesh with a flavor you just have to try to believe! The large, round tubers hold their shape and color during cooking, making them a great all-around choice for boiling, baking, frying, and mashing. If you just can't wait until harvest time for a potato fix, pluck these new red potatoes earlier for a simple, tasty treat - boiled, lightly seasoned, and straight to your plate!

Superior

White, Superior is a widely-grown, popular variety. Early maturing, moderately-high yields, and minimal skinning enables growers to dig and market quickly. Round to oblong tubers with buff, slightly flaky skin and white flesh are suitable for many uses. Good resistance to internal defects and common scab. Reliable and early, Superior is always one of the first varieties Excellent for chipping, but suitable for all cooking styles.

All of these potato varieties are available in Size B as well. Size A's are 1.5"-3.25" and they usually require cutting. Size B's are 1.5"-2" and usually are planted whole.

(Totes with 2,000 lb Seed Potatoes available, call for pricing.)

VYB-.50	.5 m	\$124.43
VYB	1 m	\$118.50

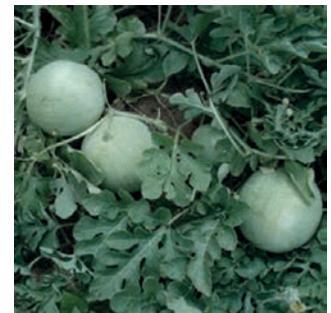

Watermelon - Triploid

Seedless watermelons require special conditions to germinate. They may not field germinate and it is recommended to get an experienced grower to start them. Potting soil must be light and coarse and temperature 90 degrees. Water and heat soil before planting, and seed 1" deep. Do not water again until they emerge, 2-4 days max. Then keep heat stable at 70" until planting.

VACP Accomplice

Accomplice pollinator has intermediate resistance to Fusarium wilt (races 0 and 1), it also offers resistance to Anthracnose (race 1). Its small vine, which does not compete with seedless watermelon varieties, is a prolific producer of male flowers throughout the entire crop cycle. As with Side Kick watermelons, plant one Accomplice between each third and fourth plant for optimum pollination. Also, the fruit produced by Accomplice are small and easily distinguishable from all seedless watermelon varieties.

A note from us:

If you order any watermelon seeds you're automatically agreeing to the following terms: Bacterial fruit blotch (BFB) on melons caused by *acidovorax avenae* subsp. *Citrullis* is a serious disease that has become a significant risk factor in many areas where melons are grown. Gummy stem blight (GSB) is caused by a fungus, *didymelia bryoniae*, that attacks melons and cucurbits. Yield loss due to GSB occurs as a result of rapid defoliation of vines and fruit infection and decay. The pathogen causing BFB of GSB can be introduced into a field by infested seed, infected transplants, cucurbits, mechanical means or natural spread for alternate hosts. It is impossible to conduct any test which has 100% reliable results in identification of any seed borne GSB or BFB. However manufacturers are doing their best to test and/or treat the melon seeds ad any seed sold is tested to current industry standards.

All seed sold by Martin's Produce Supplies is tested by the manufacturers and are warranted by the manufacturers that the test results have shown no evidence to BFB of GSB. But they cannot guarantee that the seeds are free of BFB or GSB. In no case shall Martin's Produce Supplies or the Manufacturer be held responsible for anything beyond the original purchase Price and if in any event Martin's Produce Supplies is forced to take legal action the purchaser shall be responsible for any legal/ attorney fees. Martin's Produce Supplies cannot be held responsible for any losses or damages relating to BFB and/or GSB. No warranty is given to any melons or cucurbits.

Seeds are sold only in the package sizes listed below. Prices are per lb or per m.

Vacuum Seeder

- An economical, fast, and easy way of seeding seeds into trays
- Seed plates are made of aluminum and are very easy and quick to change via clamps
- Easy to use, Hook up a vacuum to hose, spread seeds over plate and seeds will be vacuumed to the micro holes in plate, flip seeder box to the side with the seed reservoir section down and excess seed will fall into seed reservoir section, then turn the seeder box upside down over the tray and close valve to cut vacuum and seeds drop into tray
- Multiple tray sizes available

NEW ITEM! Dutch Bucket with Siphon Elbows

A hydroponic Dutch bucket system with 2.9 gallon capacity. Each Dutch bucket is connected to a nutrient supply line. The most common method is drip irrigation where a regulated flow of nutrient solution is delivered to each bucket through a small tube.

The nutrient solution provides water and essential nutrients to the plants. The hydroponic Dutch bucket system offers a compact and manageable solution for growing plants hydroponically. It is suitable for small-scale operations or when space is limited. By delivering controlled nutrient solutions and maintaining a stable growing environment, this system can help optimize plant growth and maximize yields.

High quality hydroponic Dutch buckets for greenhouse are designed to be fed by drip emitters and plumbed to drain into a 1.5" PVC pipe. Siphon elbows regulate the safety reservoir of nutrient solution at the bottom of the bucket to 1" deep. This feature prevents the growing medium from drying out and causing stress between irrigation cycles. Siphon pipe also prevents over accumulation of nutrient solution. Two siphon elbows are recommended per each bucket. You can use just about any type of growing media, including perlite and coconut coir. Ideal for tomatoes, cucumbers, peppers, scallions, basil, other herbs and much more!

THIS ITEM IS NOT STOCKED, YOU MUST PREORDER THIS BUCKET AHEAD OF TIME.

A HUBER COMPANY

Why Miller?

HERE'S WHY!

Miller is your trusted partner for exceptional crop production. At Miller we've been solving the tough problems for growers globally for over 80 years. Leading the way in science, experience and education, we develop products specifically engineered to deliver superior results, one crop at a time.

- Our team is comprised of highly trained agronomists, horticulturalists, and crop advisors who provide technical support and product programs designed to maximize return on investment
- Miller makes sure that raw materials used contain the lowest possible level of chlorine and in some cases, are totally free of chlorine
- Miller only uses 100% EDTA chelated micronutrients

Standard Macronutrients

MIL320, 20-20-20

Nutri-Leaf[®] 20-20-20 + Micros is a balanced soluble nutrient fertilizer of high technical grade with micro elements. It is designed to increase the yields of the crops throughout their growth cycle where balanced fertility is required for vegetative and crop development.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL320	25 lb	\$42.84	\$45.62

Crop Finisher 4-2-41

Crop Finisher[®] 4-2-41 + 2% Mg is a unique potassium formulation with EDTA chelated minor elements and increased magnesium designed to provide crops the required nutrition necessary for finishing late season development.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL4241	25 lb	\$43.14	\$43.64

Nutri-Chem 9-15-30

NutriChem[®] 9-15-30 + Micros is a fertilizer for use during periods of high demand for potassium, such as at fruiting and maturation.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL91530	25 lb	\$46.02	\$48.95

Sol-U-Gro 12-48-8

Sol-U-Gro[®] 12-48-8 + Micros is a fertilizer to be used when crops demand increased levels of phosphorus such as at transplanting, at bloom and late season to secure bud formation on fruit trees.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL12488	25 lb	\$51.62	\$45.60

Miller 20-5-5 w/minor elements

General use: 5 - 10 lbs per acre. use this product as a foliar application to supplement the normal soil applied fertility program. Can be applied by aircraft at rates equivalent to one pound in one gallon of water, per acre. For back pack sprayers use at the rate of 6 grams per liter or 4 tsp/gallon.

ITEM #	QTY/WEIGHT	PRICE
MIL2055	25 lb	\$44.96

Specialty Macronutrients

Sugar Express 4-10-40

Sugar Express[®] 4-10-40 is a highly refined fertilizer with the appropriate ratio of phosphorus and potassium designed to be used close to harvest. Sugar Express is a premium quality foliar fertilizer, unique in the market and exclusively offered by Miller.

ITEM #	QTY/WEIGHT	PRICE
MIL41040	25 lb	\$105.64

Nutrient Express 4-41-27

Nutrient Express[®] 4-41-27 is a unique blend of phosphorus and potassium for use during fruit formation and under heavy crop loads.

ITEM #	QTY/WEIGHT	PRICE
MIL44127	25 lb	\$165.65

Cell Force MAX

Cell Force Max 6-0-0

Cell Force[®] MAX 6-0-0 is a liquid specialty fertilizer that is powered by S.M.A.R.T. technology. Designed to reduce calcium disorders and cellular leakage in plants.

ITEM #	QTY/WEIGHT	PRICE	2+
MIL600	2.5 gal	\$102.68	\$96.77

Miller's Supreme 16-4-13

Limit of solubility = 3 lbs per gal. Vegetable crop use rates of 3-5 lb per acre per day for a supplemental feeding through drip irrigation. Ornamentals use rate of: 1-100 ratio @ 200 PPM = 16.67 oz per gal. 1-100 ratio @ 300 PPM = 25 oz per gal. rate of: 1-100 ratio @ 300 PPM = 25 oz per gal.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL16413	25 lb	\$89.56	\$79.47

Biostimulants

Greenstim

Greenstim 2-8-14

Greenstim[®] 2-8-14 is a proprietary liquid fertilizer combined with plant betaines to promote vigorous root and plant growth during periods of environmental stress.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL250	2.5 gal	\$197.16	\$184.25

MycoApply Ultrafine Endo

MycoApply[®] Ultrafine Endo is a suspendable powder mycorrhizal inoculum consisting of 4 species of endomycorrhizal fungi. About 85% of the world's plant species form symbiotic relationships with this type of symbiotic soil fungus. These beneficial fungi greatly increase the effective rooting area of plants, thereby enhancing plant growth, vigor, and tolerance of environmental extremes. MycoApply[®] Ultrafine Endo is a concentrated, fine, suspendable material with a particle size less than 300 microns (will pass a #50 screen) containing mycorrhizal propagules, which colonize roots and extend into the surrounding soil forming an essential link between plants and soil resources. Increasing the rooting area allows improved access to water and nutrients, promoting plant quality and crop performance. We are now carrying the MycoApply Injector Endo which is very concentrated that will treat 500 gallons where the MycoApply Ultrafine Endo will treat 37 gallons.

ITEM #	DESCRIPTION	PRICE
MYCULE	MycoApply Ultrafine Endo, 1LB Bag	\$34.24
MYCINE	MycoApply Injector Endo - 100 G Bag	\$293.74

C.A.L.F.A.

MILCALFA, C.A.L.F.A. 2.5 Gal.

C.A.L.F.A.[®] is a proprietary blend of 40% nature-based carboxylic acid solution designed to release soil nutrients into plant available forms during critical plant growth and development stages. This product enhances calcium, phosphate, and micronutrient uptake while solubilizing and leaching sodium in high sodium soils.

ITEM #	QTY/WEIGHT	PRICE	4+
MILCALFA	1 gal	\$168.22	\$0.00

Cytoplex HMS

Cytoplex[®] HMS is a Plant Hormone Supplement consisting of EPA-registered sea plant extracts in addition to gibberellic acid and indole-3-butyric acid. This product enhances root development.

MIL99	1 gal	\$132.25	\$132.90

Micronutrients

Mag-Si Chelated Magnesium

5% Magnesium & .5% Silicon 5lb bags, A chelated product for plants needing extra magnesium.

ITEM #	QTY/WEIGHT	PRICE	10+
MILMAGSI	5 lb	\$62.57	\$61.85

Microplex

Microplex® is a chelated EDTA blend of eight micronutrients designed for maximum plant response in foliar or soil applications. Compatible with phosphate-based fertilizers.

ITEM #	QTY/WEIGHT	PRICE
MIL102	5 gal	\$48.26

Borpower, Boron 10%

BorPower is used on field crops, tree fruit, vegetables, and ornamentals for the prevention and correction of Boron deficiencies. Also can be used with a starter fertilizer if it does not come in direct contact with the seed.

ITEM #	QTY/WEIGHT	PRICE
POWAGBO	2.5 gal	\$52.29

Calcium Nitrate (ag grade)

For side dressing only. (Does not dissolve easily. 15.5-0-0 + 19% Calcium.

ITEM #	QTY/WEIGHT	PRICE
CNA50	50 lb	\$24.91

Mono Potassium Phosphate 00-52-34, (water soluble)

The preferred source of phosphorus and potassium when nitrogen fertilization should be limited. Can be applied in combination with other fertilizers to meet crop nutritional needs throughout the growth cycle.

- At the early stages of the growth season when phosphorus and potassium are needed at high rates for the establishment of root system.
- During the productive stages of sugar-rich fruit crops, to increase sugar content and to improve fruit quality.
- Fully water-soluble.
- Consists of 100% plant nutrients.
- Free of chloride, sodium and other detrimental elements for plants.
- Safe for plants and humans, due to moderately low pH and low salt index.

ITEM #	QTY/WEIGHT	PRICE
MPP50	55 lb	\$89.60

ZMC Express

ZMC Express® is a chelated EDTA blend of micronutrients. It is used for treatment of soils and crops where micronutrient deficiency is diagnosed or suspected.

ITEM #	QTY/WEIGHT	PRICE
MIL101	5 lb	\$49.97

Iron Chelate

Iron DP® 10% is based on DTPA chelating agent. Provides maximum iron availability in soil pH ranges from 6-8.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL93	5 lb	\$66.92	\$60.88

Calcium Chelate

Calcium Chelate 9.5% EDTA is an excellent foliar or soil applied source of calcium to plants. Compatible with phosphate-based fertilizers through drip systems.

ITEM #	QTY/WEIGHT	PRICE	10+
MIL95	5 lb	\$43.82	\$41.47

Sulfate of Potash

Potassium Sulfate of Potash Water Soluble 0-0-52 is OMRI listed and the main source of chlorine-free natural potassium and a necessary complement to achieve high-quality and nutrient balanced crops. Besides making the crop more drought resistant, potassium produces tastier, healthier and more colorful fruits and vegetables with extended shelf life. Potassium is completely water-soluble and contains 52% soluble potash and 18% sulfur.

ITEM #	QTY/WEIGHT	PRICE
SF0052	52 lb	\$51.46

Nutri - Cal 2.5Gal

Nutri-Cal® liquid calcium solution for foliar application on fruit and vegetable crops is a unique formulation, consisting of T.O.G., an organic complexing agent which masks the calcium ion, creating a molecule that is easily absorbed and is efficiently transported throughout the plant to the fruit cells. There are no chlorides or sulfates. It has a low salt index and is therefore non-corrosive. Nutri-Cal® liquid calcium supplement improves firmness and storage life. University research and use by countless growers has proven the capability of Nutri-Cal® liquid calcium supplement to improve fruit quality and firmness -- increasing storage life. Longer storage life means marketing your product when price is best and selling at premium prices.

ITEM #	PRICE
NUTRI	\$63.95

Nitro-28® SRN 28-0-0

Nitro-28 (28-0-0) is a proprietary liquid slow release nitrogen based on methylene urea technology. This product is a clear 28% nitrogen solution that contains 2.92 pounds of nitrogen in every gallon. Nitro-28 has an extended shelf life and ensures a stable product even when stored in below freezing temperatures. As with all Nitro products, Nitro-28 provides crops with the same proven results; a steady, uniform and non-phytotoxic supply of nitrogen for extended periods of time. Use as a foliar feed. Nitro-28 is rain fast in a matter of minutes.

All T-Growth Products available in 30 gal, 55 gal, and 275 gal. totes.

ITEM #	PRICE
Nitro28	\$55.25

Nutri - K 2.5Gal

NUTRI-K is a special liquid formulation of highly soluble potassium and a unique complexing agent T.O.G.. This combination provides a high quality and readily available source of potassium to be utilized by plants. NUTRI-K contains NO nitrates, chlorides or sulfates. NUTRI-K has a low salt index and is non-corrosive. Nutri-K may be applied to a wide variety of horticultural, turf, greenhouse, ornamental and all agricultural crops. Potassium requirements for most crops increase during periods of rapid growth and fruit development. Application of Nutri-K should be made based on soil and/or plant tissue analysis for potassium.

ITEM #	QTY/WEIGHT	PRICE	2+
NUTRIK	2.5 gal	\$65.75	\$57.39

Calcium Nitrate (greenhouse grade)

Highly pure white very fine crystals. Easily and totally soluble calcium nitrate that dissolves like no other calcium nitrate. All nitrogen is in the nitrate form and it does not contain any ammonium nitrogen. It is a very low nitrogen with a high calcium content. Made in the USA.

ITEM #	QTY/WEIGHT	PRICE
CNG50	55 lb	\$27.42

Potassium Nitrate 13.5-0-46.2

Potassium nitrate is mainly used in fertilizers, as a source of nitrogen and potassium - two of the macronutrients for plants. When used by itself, it has an NPK rating of 13.5-0-46.

ITEM #	QTY/WEIGHT	PRICE
PN50H	50 lb	\$59.97

Crop Production Aids

Vapor Guard

Vapor Gard® is a Pinolene® based product for use on specialty crops to reduce water evapotranspiration. Helps guard against frost damage and helps prevent transplant shock.

ITEM #	QTY/WEIGHT	PRICE	4+
MILVG	1 gal	\$67.16	\$62.51

Miller Hot Sauce Animal Repellent

Miller Hot Sauce repels deer, rabbits and mice. Effective on fruits, nut trees, vegetables, vine crops and ornamentals. Mix 4 ounces of Hot Sauce with 1 Quart of Vapor Gard to 50 gallons of water. Mix with Millers Vapor Gard to extend the effectiveness of the repellent. Not to be used once fruit is visible. Comes in a 1 gallon container.

ITEM #	QTY/WEIGHT	PRICE	10+
MILHS1	1 gal	\$259.25	\$277.52

Sulforix

Sulforix® is an EPA-registered fungicide, insecticide, and miticide with unique penetration capabilities into bud scales, wood tissue and plant surfaces. Use rates are lower than Lime Sulfur® and has many in season crop applications.

ITEM #	QTY/WEIGHT	PRICE
MIL82	5 gal	\$76.53

Reflections Crop Protectant

Reflections® is a blend of calcium acetate and calcium carbonate that provides 30% calcium in a soluble form. Due to its reflective nature, when it's applied to a plant the primary benefit is a reduction in heat stress and sunburn to the plant.

ITEM #	QTY/WEIGHT	PRICE
MILRE	2.5 gal	\$53.64

Hormodin 1 Rooting Powder

Hormodin is a root inducing plant hormone. Hormodin is a formulation of indole-3-butyric acid (IBA). IBA is a synthetic auxin rooting hormone, which acts as a root stimulant.

Hormodin enhances rooting, which reduces propagation bench time and plant loss. Hormodin is easy to use, yielding steadfast performance of rooted cuttings and zero disease migration.

To apply Hormodin, moisten cuttings, in particular the basal ends of the cuttings before treatment (except geraniums). Pour a small amount of Hormodin into a bowl or pan. Dip and stir basal ends of the cuttings in Hormodin. Remove excess powder by tapping on the rim of the container. Then, plant treated cuttings in rooting medium. Simply stated, "Dip it - Tap it - Stick it". Hormodin works best when used on fresh cuttings.

ITEM #	PRICE
HORROP	\$32.00

ORGANIC

Biostimulants

TerraGrow

TerraGrow is a powdered blend of carefully selected beneficial bacterial and fungal spores that was developed to improve soil characteristics and plant stress tolerance. TerraGrow quickly reestablishes beneficial bacteria and fungi populations in and around the root zone. TerraGrow can be used throughout the growing season to improve soil health and plant vigor. Use in conjunction with TerraClean 5.0 bactericide/fungicide for a complete soil treatment program.

Soil, Water, and Tissue Testing

This program is to give growers options for where to go for various forms of crop tests during the season and off-season. There are many benefits o performing a soil, plant tissue and Irrigation water test. Optimizing crop production, correction of pH in soil and water and learning what nutrients are lacking at the appropriate times are just a few pros to these tests.

Each test kit box includes a package or bottle for test material. Your job is to collect samples of water, soil or plant tissue, place them in a box, and mail/ship them to the lab. Once the results come back, we can either send you the results for your own fertilization program or have our consultant give you recommendations on a fertilization program.

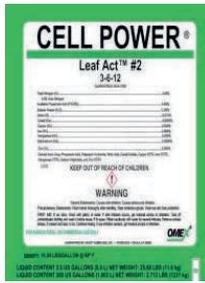

ITEM #	DESCRIPTION	PRICE
TEST/LEAF	Plant Tissue Test	\$29.00

Pressure Regulators

Pressure regulators are recommended for all drip irrigation systems. If no pressure regulators are used high pressure surges or high pressure operation can cause damage to drip tape. Regulators should be installed close to the field being irrigated. The 1.5" regulators have springs to maintain a constant pressure. These springs can be changed to change the pressure. NOTE: Flow rate on all regulators must be matched to your drip irrigation system or field size. These pressure regulators are flow activated, water must be flowing through to make them work.

Ultra High Flow Pressure Regulator

The PRU (Pressure Regulator Ultra) is designed to maintain a preset pressure for higher flows of 20 to 100 gpm (4542 to 22713 L/hr). The compact size makes it convenient for use in a valve box. Its 2-inch inlet and outlet size make it an ideal option for accurate zone and individual sprinkler pressure control. One PRU can be used in place of a manifold of multiple smaller regulators. Reliable: Accuracy and quality you can count on with Senninger pressure regulators, Convenient: Compact size fits in a valve box; Economical: Competitively Priced

Garden Drip Kit

Garden Drip Irrigation Kit (20 rows)

This is a complete garden irrigation kit in a box. It has everything you need to set up your garden up to 20 rows 50' long or a total of 1,000' of row length.

Kit includes;

- 1- Roll of Chapin 6" Drip Tape 1000'
- 1- Roll of 3/4" x 100' Orchard Tubing (55 PSI)
- 20- Drip Tape Valve w/Green Handle .250 Barb Fitting
- 20- Drip End Sleeves
- 6- Yellow Drip Coupling w/clear lock nuts Fitting
- 1- Pack of Goof Plugs 1/8" - 1/4" Holes (Pack of 10)
- 1- 1/8"-1/4" Economy Punch
- 1- 3/4 Dig Filter w/Regulator Fht x Mht assembly
- 1- 3/4" Power-loc x Fht Fitting
- 1- 3/4" Power-loc End Cap Fitting

Irrigation Supplies

Sprinklers

This medium volume sprinkler gun is suitable for use in general field irrigation on solid set travelers, center pivots, etc. Changing from part circle to full circle operation is easy by adjusting trip stops. Komet #163 shows good performance on windy conditions. We also carry some common parts for the Komet gun.

Wobbler

The Wobbler, first introduced in 1980, uses Senninger's off-center rotary-action technology, which provides extremely uniform coverage over a large diameter at low-pressures. It produces droplets that resist wind-drift and are applied in a gentle rain-like pattern. The Wobbler is constructed entirely of engineering grade thermoplastics for excellent corrosion resistance and is extremely durable due to having only one moving part.

Foggers

The Senninger Fogger helps reduce temperatures and increase humidity levels in greenhouses. It distributes extremely fine droplets with excellent pattern uniformity creating ideal conditions for plant propagation.

Features:

- Built-in check valve provides instantaneous shutoff and helps prevent leakage
- Easy clean nozzle with tool-free disassembly
- Average flow rate per nozzle: 1.6 gph
- Operating pressures: 45 to 60 psi
- Multiple connection options: 1/2" male NPT,
- 3/8" male BSW, 1/4" barb, also available as 1/4" press fit

Recommended installation:

PROPAGATION	
Four Way Adapter	
Min. Installation Height*	1.5 to 2.5 ft
Head Spacing	3 ft

COOLING AND HUMIDITY CONTROL	
Four Way Adapter	
Min. Installation Height*	3 to 6 ft
Head Spacing	3 to 10 ft
Lateral Spacing	5 to 15 ft

* Height above the plant. For benches up to 8' wide, install two lines of foggers centered over the bench for a more uniform application. Do not install fogger lines more than one from the edge of a bench. 140 mesh filtration required.

* Mount Foggers as high as possible. Install drops perpendicular to the lateral line. Avoid spraying against roof or greenhouse structure. 140 mesh filtration required.

ITEM #	DESCRIPTION	PRICE
SEF0GGER	Fogger - 1.6 gph	\$3.58

Micro Sprinklers

Senninger Upright Micro Sprinklers are ideal for nurseries, orchards, vineyards, and vegetables. Inverted models are designed for overhead use in greenhouses, shade and hoop houses.

Features:

- Multiple connection options: 1/2" male NPT, 3/8" male BSW, 1/4" barb, also available as 1/4" press fit

Misters

The Senninger Mister™ is designed for propagation and other low volume misting applications. It provides consistent system startup delivering an instantaneous, highly uniform distribution ideal for short-cycle applications.

Features

- Bridgeless design for uninterrupted 360° distribution pattern
- Easy clean nozzle with tool-free disassembly
- Multiple connection options: 1/2" male NPT, 3/8" male BSW, 1/4" barb, also available as 1/4" press fit.

Recommended spacing:

INVERTED - at 24 inch height above crop	
Pressure	30 - 50 psi
Light Blue - MRI 08	7.5 - 9.7 gph
Head Spacing	2 - 4 ft
Lateral Spacing	2.5 - 3.5 ft
Single Row Spacing	N/A
Blue - MRI 12	12.5 - 16.2 gph
Head Spacing	2 - 3.5 ft
Lateral Spacing	2.5 - 3.5 ft
Single Row Spacing	N/A
Purple - MRI 16	15.9 - 20.5 gph
Head Spacing	2 - 3 ft
Lateral Spacing	2 - 2.5 ft
Single Row Spacing	2 - 2.5 ft
Black - MRI 20	17.8 - 23.4 gph
Head Spacing	2 - 2.5 ft
Lateral Spacing	2 - 3 ft
Single Row Spacing	2 - 2.5 ft

UPRIGHT - at 12 inch height above crop	
Pressure	30 - 50 psi
Red - MR 08	6.8 - 8.6 gph
Head Spacing	2 - 4 ft
Lateral Spacing	2 - 4 ft
Single Row Spacing	2 - 3.5 ft
Orange - MR 12	10.8 - 14.0 gph
Head Spacing	2 - 4 ft
Lateral Spacing	2 - 4 ft
Single Row Spacing	2 - 3 ft
Yellow - MR 16	14.1 - 18.3 gph
Head Spacing	2 - 4 ft
Lateral Spacing	2 - 4 ft
Single Row Spacing	2 - 3 ft
Green - MR 20	17.8 - 23.4 gph
Head Spacing	2 - 4 ft
Lateral Spacing	2 - 4 ft
Single Row Spacing	2 - 3 ft

Other spacing options may produce higher uniformities and lower scheduling co-efficiencies. Check valve option on inverted models is available with different spacing recommendations. Consider friction loss through tubing when designing for optimum performance. 140 mesh filtration required.

All T Sprays

The Senninger T-Spray delivers a fine spray - ideal for delicate stock. It can be mounted upright or inverted and is also available in a high angle model for upright installations only.

Features

- 360° Spray nozzle.
- No moving parts for longer life
- High-angle upright T-stem provides larger diameter of coverage
- Color-coded stems for easy size identification

Senninger 4123

Senninger's Part-Circle sprinklers are designed specifically for use where a directional impact sprinkler is required. Engineered to deliver maximum efficiency at low to moderate flow rates for agriculture, nursery, effluent disposal, dust suppression, and industrial applications. Reach diameter based on 1.5 height.

Features

- Distributes water in a 60° - 360° adjustable pattern in 5° increments, no tools needed
- Easily convertible to full-circle operation
- Covered reversing mechanism
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Inlet size: 3/4" M NPT
- Flow range: 2.42 to 16.10 gpm (550 to 3657 L/hr)

Irrigation

High Angle Smooth Drive Sprinkler

Senninger's new Smooth Drive's unique walking diffuser helps deliver an extremely uniform pattern, without distortion from bracket legs.

Features

- Low Angle (LA) model is ideal for under trees
- High Angle (HA) model for open field
- Walking diffuser - for outstanding
- uniformity, no bracket-leg shadow and gentle application
- Precision-contoured deflector - provides greater throw and enhanced distribution
- Advanced braking mechanism - for smooth, consistent rotation speed and minimal riser stress
- Rugged design - stands up in harsh field conditions

Irrigation Field Stand Assembly

This irrigation stand is a very easy and economical way of irrigating long rows of produce. To install, first lay the orchard tube, then punch a hole in orchard tubing at predetermined sprinkler location, insert fitting from assembly, pound in 5/16" steel rod or PVC pipe and attach agri connector to stake. At the end of season it is very easy to disassemble and store for the winter.

Controllers

DC Irrigation Controller

Features

- Operate one valve or up to four stations with sensor and master valve (four station) without AC power hookup
- Four button keypad with an integrated LCD display
- Easy to read AM/PM clock
- Independent programming for each valve (four station)
- Can operate two valves simultaneously (four station)
- Digital icon indicates station in operation (four station)
- Automatic, semi-automatic and manual operation
- Operates with R710DC latching solenoids
- Irrigation suspension override (rain mode)
- Master valve wires included with the four station model
- Withstand harsh climatic conditions - rated IP68, the highest attainable code classifying the degree of protection against water intrusion (completely sealed and waterproof)
- Mount to valve or valve box wall
- Powered by one 9-volt alkaline battery (not included) featuring low power consumption
- Program stored for up to 20 seconds during battery change
- Single station includes the solenoid

Pumps

Steps To Selecting a Pump

- Start with your desired PSI at the end of your line.
- Add PSI loss, use elevation conversion scale on page 109 to figure PSI loss per foot of rise
- Add friction loss per pipe type from page 110
- Add filter PSI loss, approx. 5-10 PSI
- Total would indicate what PSI you would need at the pump to irrigate

IPT Pump (6.5 HP)

IPT 2" Engine Driven Portable High Pressure pumps are cast aluminum construction with cast iron volute and male NPT ports. Pump applications include fire protection and irrigation. These pumps are available with a wide choice of standard and heavy duty gasoline or diesel fueled engines. These pumps feature high efficiency closed cast aluminum impeller. All models come equipped with EPDM/EPR elastomers and seals. Most models include a heavy duty steel roll frame.

Features

- Cast Aluminum Construction
- EPDM/EPR Mechanical Seals
- Optional Viton® Seal and Elastomers Available
- 2" Cast Iron Suction & Discharge Male NPT Port Sizes
- Maximum Flow up to 130 GPM
- Maximum Head up to 108 PSI
- Maximum Lift to 26 Ft.
- One Tool Serviceability
- Utilized for Fire Protection or Irrigation
- Discharge Port Rotates in 90° Increments
- Engine Options: Honda, Briggs & Stratton Gasoline or Hatz Diesel Engines

Water Filters

Triton® Sand Filter

The Triton II filter is the result of over 40 years of product evolution and refinement. It has set the industry standard for effectiveness, efficiency, long runs between service and providing years of dependable, low maintenance operation. The Triton II filter features a special internal design that keeps the sand bed level, ensuring even water flow and resulting in the most efficient filtration possible.

- Time-proven internal design ensures that all water receives maximum filtration for crystal clear results.
- GlasLok™ Process creates a one-piece, fiberglass-reinforced tank with a UV-resistant coating for years of dependable, corrosion-resistant service.
- Flow system design controls filtration quality and ensures maximum run times between backwashing to save you time.

Filters

2" or 3" Plastic Disk Filter

Disk filters are designed to clean dirty water for drip irrigation systems and handle up to 3 times more dirt and debris than screen filters, before cleaning is necessary. The design of the "disk" filter is a stack of disks pressed together. These disks have tiny grooves allow clean water to pass through. To clean the filter, remove the cover, loosen the stack of disks and wash between the disks; reassemble.

- Designed for use as a primary or secondary filter
- For use with water containing high amounts of organic or inorganic matter

API Spin Clean Filters

These filters are used to clean water for drip irrigation systems. They clean well water, or relatively clean water and work especially well for filtering sand out of water. But they are not recommended for surface water containing algae. We recommend a pressure gauge on the filter inlet and outlet to determine when the filter is clogging and to avoid unnecessary cleaning. For drip irrigation tape, mesh size should not be coarser than 120 mesh. Mesh size over 175 create unnecessary filter cleaning and clogging. Filters are built from a high heat, chemical resistant glass-reinforced plastic and have a stainless steel screen. Made in USA.

Venturi injectors are a high efficiency, differential pressure injectors. The pressure difference creates a vacuum inside the body which results in suction through the suction port. These injectors are trouble free because they have no moving parts. Complete units similar to above have a brass check valve, brass gate valve, flow meter, pressure gauge, and a Mazzei injector unit with bypass, all mounted on a treated wood frame for a long life.

Dramm HD Hose Reel

The Dramm Heavy-Duty Hose Reel is the perfect match for Dramm Garden Hose. A convex design prevents the hose from pinching against the side wall. A spring-pin lock keeps the reel from unwinding when not in use. An adjustable break can prevent freewheeling of the reel. A stainless steel axle and PTFE bearings make winding easy. This Heavy-Duty Hose Reel can hold up to 175' of 5/8" or 150' of 3/4" Dramm Hose and includes a 10' x 3/4" leader hose for easy connection to the tap. Includes a mounting bracket with different mounting options.

Mulch Bed Layers

Rain Flo2470 Raised Bed Plastic Layer

- Will lay 4' plastic, 30" bed top, with minimum 58" row spacing
- Adjustable 3" to 5" bed height
- Requires minimum 30-hp with 4-wheel drive
- 50 gal. water tank to adjust weight to match tractor size
- Compact machine for high tunnels and small tractors
- Adjustable tension brake on plastic roll carriers
- Replaceable, reversible plow shares
- 3/8" & 1/2" UHMW poly lined bed press
- Category 1 or 2 – 3-point hitch

Options

- Optional single or double drip applicator
- Optional center fillers, for heavy soil
- Optional crowned bed available

ITEM #	PRICE
RAI2470	\$3,875.00

Rain-Flo 2570 & 2670 Raised Bed Mulch Layers (Series II)

2570 Mulch Layer W/ Auto Ro-Track

- 60" row centers with 4' plastic, 60 hp FWD minimum
- Adjustable plastic width from 3 ft. or 4 ft. wide plastic
- Adjustable bed height from 3" to 7" high bed
- On the go cover disk adjustment
- Adjustable brake tension on plastic roll carriers
- Bed press has adjustable side press plates
- With operator seat
- Adjustable row marker
- Replaceable, reversible plow share blades
- UHMW (replaceable) poly lined bed press
- Spring loaded shovels on side, help loosen soil for cover disk
- Category II, 3-point hitch

Want to see it work before buying? Ask about our demo and rental units.

Options

- Automatic steering correction (Ro-trak) for hill sides
- Hydraulic cover disk adjustment
- Single or double drip attachment
- Crowned bed press for level fields
- Center fillers, to help fill center of bed
- 400 lb. Stainless steel ground driven fertilizer hopper
- Fumigation tank mounts with gas knives

ITEM #	DESCRIPTION	PRICE
RAI2570	Rain Flo 2570 Mulch Layer W/ Auto Ro-Track	\$6,000.00
RAI2670	Model 2670 Raised Bed Layer w/ Auto Ro-trak	\$6,550.00

Mulch Bed Planters

Model 2670 Raised Bed Layer w/Auto Ro-trak

- 64" row centers with 4' plastic, 70 hp FWD minimum
- Adjustable plastic width from 3 ft. to 5 ft. wide plastic
- Adjustable bed height from 5" to 9" high bed
- On the go cover disk adjustment
- Adjustable brake tension on plastic roll carriers
- Bed press has adjustable side press plates
- With operator seat
- Adjustable row marker
- Replaceable, reversible plow share blades
- UHMW (replaceable) poly lined bed press
- Spring loaded shovels on side, help loosen soil for cover disk
- Category II, 3-point hitch

Options:

- Automatic self steering Ro-trak for hill sides
- Single or double drip applicator
- Crowned bed press for level field
- Center fillers, to help fill center of bed
- 400 lb Stainless Steel ground driven fertilizer hopper
- Fumigation tank mounts with gas knives

Description:

- Manual without Auto Ro-Trak deduction
- Drip attachment
- Double drip attachment
- Center of bed fillers
- Crowned bed
- Dry fertilizer hopper, 400 lb ground drive

Rain-Flo Flat Bed Mulch Layer

- Will lay 3' - 5' plastic; minimum 58" row spacing
- Requires minimum 35 hp with 4-wheel drive
- On the go cover disk adjustment
- Has extra plastic roll carrier
- 16" cover disks with dirt shields
- Compact machine has category I, 3-point hitch
- Lays clear plastic over sweet corn
- Has adjustable row markers
- Adjustable tension brake on plastic roll carriers.
- Independent disk and press wheels

Options

- Optional depth wheels (for sweet corn)
- Optional single or double drip applicator

ITEM #	DESCRIPTION	PRICE
RAI2370	Flatbed Mulch Layer	\$2,950.00

Rain-Flo 480 Plastic Mulch Layer

- 60" row centers, 80 hp FWD Minimum
- Adjustable bed height; 4" or 8"
- Lays 48" plastic only
- Automatic steering correction (Ro-trak)
- Automatically starts standard plastic film
- Manual plastic & drip tape cutters
- On the go plastic roll change & cover disk adjustment
- Adjustable crowned or flat bed top
- Adjustable brake tension on plastic roll carriers
- Adjustable row markers
- Category II, 3-point hitch
- With operator seat
- Replaceable, reversible plow share blades
- UHMW (replaceable) poly lined bed press

Options

- Optional depth wheels (for sweet corn)
- Optional single or double drip applicator

ITEM #	DESCRIPTION	PRICE
RAI480	48" with Auto Ro-Trak	\$8,050.00

Compact Raised Bed Layer

RB 436

- Lays 3' wide plastic with 4" high and 20" wide bed.
- 25-30 hp required

RB448

- Lay 3' or 4' plastic with 4' high and 20 or 30" wide bed.
- 30-35 HP required.

Reyfilm Bio – Biodegradable Mulch Film

Embrace the Future with Biodegradable Mulch Film! Benefits:

- Effective: Same benefits of traditional poly mulch in a fully biodegradable format. Unlike traditional plastic mulch, biodegradable alternatives break down naturally in the soil.
- Zero plastic waste: biodegradable mulch eliminates the need to remove and dispose of mulch film at the end of the cycle.

Cost-Efficiency: bio mulch is a cost-effective choice for forward-thinking farmers. Save on labor, time and money by eliminating mulch retrieval, tractor fuel and disposal costs. Thanks

to the versatility of the characteristics offered by the REYFILM BIO mulch family, these mulch films can be used in different environmental conditions, for numerous types of crops and at different times of the year. The duration of mulch in the field depends largely on environmental factors (rain, temperature, radiation and activity of soil microorganisms). The duration of mulch in the field depends largely on environmental factors (rain, temperature, radiation and activity of soil microorganisms). In general, reyfilm bio products in 15 microns (0.6 mil) are used for cultivation cycles of 2 to 6 months, and for crops lasting 9 to 12 months, thicknesses of 18 to 20 microns (0.8 mil) are recommended. Finally, for crops that require durations longer than one year, thicknesses of at least 40 microns are recommended. Reyfilm Bio has more than 15 years of monitoring usage and degradation in a multitude of crops such as tomato, pepper, lettuce, asparagus, melon, watermelon, etc.

Agricultural Film Division of SIGMA Plastics Group

Black Microembossed Film

A general-purpose mulch with superior weed control and warms the soil to give plants a quick start, giving high yields in quality crops. Retains moisture and works exceptionally well in a variety of climates and soils.

- This film is hot embossed and a softer film that stretches nicely over the bed.
- A reinforced and highly durable cast embossed film.
- Blocks weeds and prevents soil coming in direct contact with fruit and green vegetable.
- Cleaner produce, which means a higher market Price.
- Works exceptionally well in a variety of soil types and climates.
- This mulch is wind resistance and elastically, which makes it easier to apply and remove.

Characteristics and Advantages

- Two stripes identify the dripline side with the exit holes ensuring correct installation.
- Target markets include row crop (surface, subsurface and under mulch), open field and greenhouse.
- Excellent choice for close dripper spacing, low application rates and extended performance in the field.
- The integrated inlet filter and extra large cross section provide plugging protection.
- Laser drilled dripper outlet prevents root intrusion and siphon plugging.
- Exceptional filtration performance extends the range of usable fertilizers.
- A lower Cv, <2% results in highly uniform water distribution.
- Less susceptible to damage during installation and easily retrievable.
- UV resistant and resistant to common fertilizers.
- Recommended filtration: 200 Mesh for .07 GPH and .09 GPH 150 Mesh for .14 GPH, .21 GPH and .28 GPH.

Apex PC Heavy Wall Dripline

- Pressure compensating dripper is non-CNL and has the largest filtration area in its class resulting in superior clog resistance.
- Wide pressure compensation range of 7 to 60 psi.
- Excellent water distribution uniformity - from the top to the bottom of the row, every plant gets the same amount of water.
- High quality resins assure durable performance and long life.
- Dripper has a chemical resistant silicon diaphragm and MDPE body.
- Ideal for permanent crops such as nut trees, fruit trees and vineyards.
- Seven year non-prorated warranty against defects in materials or workmanship.
- Coils are rolled tight and consistent for easy installation.
- A Cv less than 5% allows design flexibility for surface or subsurface applications.
- Resistant to UV, common fertilizers and environmental stress cracking.
- Recommended filtration: 120 Mesh for all flow rates
- 18 MM, .55 GPH per dripper

Chapin Drip Tape

Unlike other tapes, Chapin Tape has a unique extruded film profile with extra strength and thickness where it is needed most: the rounded tape edges that increase resistance to abrasion and insect damage.

All Chapin turbulent flow paths have larger internal dimension, providing extraordinary resistance to clogging. Chapin drip tape consistently supplies the narrowest manufacturer's variations (CVs) in the industry for unmatched uniformity.

In addition, carefully controlled lower tension winding on reels results in easier installation thanks to less retraction, kinking and snaking in the field.

With decades of proven performances, a wide variety of flow rates, wall thicknesses and outlet spacings, Chapin drip tape provides consistently outstanding performance for the most demanding applications.

Note: Remember not to lay drip tape under tension, as stretching could occur, resulting in a damaged emitter.

Developed to our specifications. Longer runs and better uniformity than any other drip tape at 4" or 6" spacing!

425 Solo Piston Pump Backpack Sprayer

Rugged SOLO® backpack sprayers are flexible and ergonomically designed for virtually any spraying task both large and small with Fertilizers, Insecticides, Fungicides, Herbicides, Pest control, Disinfectants Built for comfort. Built for convenience. Built to last. SOLO's ergonomic design contours to your back for greater comfort. With a proven piston pump, you will be reliably equipped for applying spray liquid or insecticides in your garden. A low number of wearing parts and sturdy technology ensure a long service life and minimum maintenance. The SOLO® 425-101, with a connecting rod-actuated piston pump, can produce a wide pressure range of up to 90 psi and is capable of performing virtually every spraying task. Easily and effectively handles liquid disinfectants, fertilizers, herbicides, pesticides and formulations for tree, shrub and plant protection.

HIGHLIGHTED FEATURES

- Designed with professional features throughout.
- High-performance piston pump for increased pressure capabilities of up to 90 psi.
- Extra-large carrying handle with wand retainer for easy portability and storage. Deluxe shoulder straps and waist belt for user comfort.
- Rugged metal frame for stability when filling.
- Extra-large tank openings for easier filling and cleaning.
- 28" Unbreakable wand and shut-off valve for excellent reach.
- Commercial shut-off valve with lock-on/lock-off feature to minimize user fatigue.
- Viton® seals in key locations ensure long service and durability.
- Fold-away handle with wand retainers for easy storage and transport
- 48" nylon-reinforced high-pressure hose for extended reach.
- Double filtration system: filter basket and nozzle filter.
- Upgraded four-nozzle assortment for multiple spraying tasks: durable, professional grade, brass adjustable nozzle; fan spray; hollow cone; and jet stream nozzles. Tee Jet® compatible.

456 Professional Handheld Sprayer, 2.25 Gallon

These extremely heavy-duty sprayers will stand up to the toughest of jobs. Suitable for plant protection chemicals, pest control solutions and many other uses.

HIGHLIGHTED FEATURES & BENEFITS

- Viton® seals in key locations for durability and safety with a wide variety of chemicals.
- Large base for added stability. 458 model can accommodate the wheel set and pull handle (accessory kit, part # 49211).
- High-density polyethylene (HDPE) tank with ultra-violet inhibitors; will not dent, crack, or corrode.
- 48" nylon-reinforced hose for extended reach.
- Large piston pump pressurizes the sprayer as much as 50% faster than competitive sprayers.
- Automatic pressure relief valve releases pressure at 45 psi and may be used to release pressure manually when desired.
- 28" unbreakable wand and commercial shut-off valve assembly.
- Four-nozzle assortment for multiple spraying tasks: plastic adjustable, fan spray, hollow cone, and jet stream nozzles. Accepts TeeJet® type nozzles.
- 4.5" opening allows easy filling and thorough cleaning.
- Extra large pump handle with built-in wand retainer for convenient carrying and pumping while wearing gloves.
- Commercial shut-off valve with lock-on/lock-off feature reduces user fatigue.
- 5-year commercial warranty against defects in material and workmanship.

SOL456	\$45.35

466 Mist Blower

The new Solo 466 Mist Blower is ideal for applying plant protection chemicals, or for mosquito, pest and parasite control in storage areas, containers, or animal herds.

It is particularly popular in vector control especially in subtropic and tropic regions due to the new ULV nozzle 49480 that produces very fine droplets, applying chemicals over large areas more efficiently than manual spraying.

The striking design of the mister fan housing integrates all functional components such as starter, fuel tank, spark plug, air filter and carburetor and provides the SOLO 466 Mist Blower with an unmistakable appearance.

HIGHLIGHTED FEATURES

- New high-performance, low emission 66.5 cc 2-stroke engine to generate a fan air volume of max. 824 cfm for total plant penetration.
- Aluminum crankcase and high quality engine components for increased power output even under high temperature operating conditions.
- Increased engine performance converts to higher misting performance.
- Improved fuel efficiency and reduced emissions with modern engine technology and catalytic converter.
- Large 0.37 gallon capacity fuel tank combined with low fuel consumption allow long operating periods.
- Easy starting, fuel pump assisted.
- Effective vibration dampening.
- Single multi-function operating handle for throttle, spray volume and start/stop.
- Efficient air filtering system, easy to maintain.
- Ergonomically shaped and padded tank frame, comfortable, wide, padded shoulder straps and large, padded hip belt for superior operator's comfort.
- Compact size, low weight.
- Sturdy frame with integrated carrying handle and stand.

SOL466	\$575.29

441 Battery-Operated Backpack Sprayer

Ideal for a variety of medium-to-large spraying jobs at home and on the farm, including general spraying, weed control, and gardening. Achieve optimal spraying coverage minus tiresome pumping with the 441's robust, lithium-ion battery.

HIGHLIGHTED FEATURES

- Speed Tip Nozzle: multi-spray pattern. Sprays with 3 different settings with a turn of the dial: jet stream, flat spray and full cone mist.
- 4 gallon, UV-resistant HDPE tank with large 4.75" opening. The large filter basket is easily removed.
- 11V diaphragm pump, 37.5 PSI
- 11V Lithium-ion Battery. 2.5 hours running time. 2-hour charging time
- Integrated carry handle for easy transport and maneuvering.
- Adjustable padded straps.
- 20" unbreakable wand provides excellent reach. The wand can be stored neatly in a wand holder, protected from dirt or damage by a special opening integrated in the tank base.
- Commercial shut-off valve with lock-on / lock-off feature reduces operator fatigue.
- 48" nylon reinforced high-pressure hose for extended reach.
- Stable tank base ensures that the sprayer will not tip over when filling.

High Pressure Rinse Conveyor for:

- Carrots, Beets // Loose or bunched, Kayle, Potatoes, Summer Squash, Tomatoes, Peppers, Cucumbers, Greens, Cantaloupes, Watermelons, Radishes, Winter Squash, Pumpkins, BASKETS & More

Aluminum Harvesting Conveyor

Aluminum conveyor is designed for harvesting vegetables including: melons, sweet corn, pumpkins, broccoli, cabbage and cauliflower.

- Great for packing in bins, boxes or loose on the wagon. Mounts left or right and anywhere from front to rear of a regular farm wagon.
- Stand is 16" high and sits on one edge of the wagon. Opposite end clamps to wagon with two adjustable chains & C-clamp.
- 3.5' long fiberglass receiving and grading table.
- ¾" PVC cleats on belt. Belt travels approximately 50' per minute.
- UHMW conveyor bottom for extended belt life.
- Easily put on or taken off in minutes.
- Includes two 20' long 3/8" hydraulic hoses and a low speed, high torque hydraulic motor.
- Painted aluminum side prevents discoloration of produce upon contact with side.
- Optional: Drop lid: removable lid allows produce to fall directly into crates, bins or boxes.
- Gasoline engine: for use with horse drawn wagons or where no hydraulic is available.
- Now comes with a winch on the wagon end so you can adjust the other end up or down depending on your height desires.

Please note: there is a 5% crating & handling charge if shipped. May not be in stock all the time...please call before picking up. Don't forget – you need a track row every eight rows of produce.

Mulch Lifters

Rain-Flo Challenger 1800 Mulch Lifter

Standard Lifter – Auto-Reset Lifter

After your vegetable crop is over, the Challenger is designed to retrieve the plastic mulch to the surface of the ground. Will lift any plastic 36" to 60" with fast and easy adjustments. Lifting plows use standard Case IH 18" deep suck shears. To keep from clogging, the machine has three spring loaded trash and vine cutting disks and depth control wheels for constant depth control. Durable construction with 5/8" shear bolts (Auto reset is optional and recommended for rocky fields). This year, hitch to a Challenger and let it do the work!

Call us about renting one before buying to see for yourself.

- Approximate tractor size: 55 to 100 hp
- Will lift plastics from 3 ft to 5 ft wide with fast and easy adjustments
- Has two spring loaded trash and vine cutting disks
- Removable center disc to cut plastic in middle
- Heavy shanks have 5/8" safety shear bolts. Auto-reset is optional
- The Challenger is built to last and make your job easier.

ITEM #	DESCRIPTION	PRICE

Mesh Bird Netting 17W & 42W

Easy ON and Easy OFF! Easy Fit's patented locking square mesh design is a snap to install and comes off easily. Square meshes lock in length and width ensuring proper installed dimensions every time. And when it comes time to harvest, simply retract the netting and store out of the sun in a dry, ventilated location and you'll be all set for next year.

Easy Fit is perfect for hobby and weekend growers who plan on installing smaller volumes of net by hand or for large commercial operations that require a seasonal net that drapes well on support structures. Perfect for use as vineyard netting and blueberry netting, AviGard Easy Fit works 24/7 to keep birds out and lock fruit flavor in.

Trellis Netting Net

Trellis Netting is a strong and versatile polypropylene mesh designed for growers as a gentle and more efficient support which helps increase yields by providing greater exposure to sunlight and air circulation for climbing vegetables as well as a support for flowers. Due to its durability and practical natures, Trellis Netting is now being used by many agriculturalists and floriculturists. It is available in a variety of widths and mesh sizes and is easy to handle and install. Trellis Netting fully satisfies the requirements of a variety of growing techniques, both vertical and horizontal. The variety of sizes makes it ideal for either home gardeners or commercial growers.

BENEFITS

- Reduces installation labor costs
- Is inexpensive, rot and rust proof
- Provides better exposure to light and air
- Is aseptic, reducing pesticide costs
- Is resistant to UV rays and chemical agents
- Maximizes cultivation density
- Results in higher crop yields

The ProtekNet

The ProtekNet 25 gram insect net offers a complete crop protection against insects.

The 25 gram mesh is the most popular solution against most insects and is suitable for all types of production.

Very versatile, it can be used in the field, large tunnels or greenhouses. The net can be

installed directly on the plants or hoops for better results. This is a clear netting and has a light transmission of 89%

- Complete exclusion insect control netting for your crops.
- Highly effective against insects and birds.
- Minimal thermal effect, so it can be laid during summer time.
- Protects crops against weather damage.
- Run-resistant fabric.

Insects That the Netting Keeps Out:

- Aphids
- Armyworm
- Brown Marmorated Stink Bug
- Cabbage Root Fly
- Carrot Rust Fly
- Chrysomelid
- Corn Borer
- Flea Beetles
- Japanese Beetles
- Ladybugs
- Leafhopper

- Single point automatic calibration using Quick Cal standard or 1.41 mS/cm in standard calibration mode
- 250 hour battery life

The HI98318 is our latest pocket meter for measuring the EC/TDS of a hydroponic nutrient solution. It is only 0.7" thick, fitting comfortably in your hand. The meter has a button for turning the meter on/off and another button for automatic one point calibration.

Automatic calibration is achieved easily. Simply submerge the sensor in calibration solution and the meter will automatically detect the calibration standard (5.00 mS/cm in Quick Cal mode or 1.41 mS/cm in standard calibration mode). Temperature is automatically compensated for with the integrated temperature sensor.

- High accuracy with 0.01 pH resolution
- Two point fast and accurate calibration
- Usable with virtually any electrode that shares the same connector
- 3000 hours of battery life
- HI 1270 small diameter probe fits easily into a test tube

6 MIL Nitrile Gloves

Synthetic nitrile rubber is resistant to oil, fuel, and other chemicals and the 6 mil ntXpand provides even more resistance than the regular 4 mil glove. In addition, the extra thickness has better tear and puncture resistance than thinner gloves, making it safer to use. The fingertips are lightly textured for better grip.

Untreated White Oak Wood Stakes

This quality stake can be used for several seasons. These untreated stakes are AIR DRIED white oak stakes. Air dried stakes have a lot of benefits over green stakes. They will not turn black from mold when stored, stay straighter in the field and are lighter in weight. Try some quality, air dried, stakes for yourself to see the advantages. 1" x 1" 25/Bundle, 1200/skid

Air Release Valve

Every drip tape system should have one of these in the highest point of the system to prevent drip tape from suctioning in dirt when you shut off the water. If you shut off the water the lowest areas of a line are going to drain and the higher points are going to create a vacuum and try and suction in dirt. These will prevent that and allow clean air to enter your tape instead of dirty water coming in through the drip tape slits.

ITEM #	DESCRIPTION	PRICE
APRV1	Air/Vacuum Release Valve 1" Mipt	\$9.12

Stake Puller

This aluminum lightweight stake puller will save your back and a lot of time. Just engage it onto the stake and use it like a v handle. You will wonder how you did without it.

STOHOTBEP	Poly Frame Polycarbonate Hot Bed 6' wide x 32" deep x 15" high	\$395.00

Vegetable Seed Planter

This is a max emerge 2 row vacuum planter set up for sweet corn. The vacuum is either run by a DC/AC inverter run off the tractor battery or a hydraulic pump run off of the hydraulic system. The vacuum planter is a lot more precise and accurate in seed placement for better population than a finger pickup. This planter can be set up for no till, liquid fertilizer, or set up for various other produce crops. We need to know what seed you are using then we can get the right plate for the job. If you need a custom planter we could set one up for your exact needs.

TATER Rip Tandem Plow

Adaptable & Adjustable for planting, hilling, and harvesting.

The TATOR Rip has two plow shanks to give you the adaptability you need to work with potatoes, sweet potatoes, carrots, peanuts, and other underground crops. Use both shanks for planting, hilling, and harvesting, or you may wish to use only one shank during harvest.

ITEM #	DESCRIPTION	PRICE
TDF442	Tater Rip Tandem Plow, 35HP and up	\$898.00

RoHand II

Plant, Maintain & Harvest your Produce efficiently and pain free!

- Robust speed control for soft start/stop and overheat protection.
- Foot-controlled variable speed and steering keeps both hands free for higher productivity
- Dual gear motors and cleated drive tires provide torque and traction for the most challenging field conditions
- Compact lithium ion battery for years of trouble-free service
- Fully adjustable operator platform and head support for all-day comfort.
- Four wheeled design adds stability and allows easy on/off access from both sides of the machine
- Storage for up to 7 strawberry flats
- Roll down shade protection from hot sun or rain
- The RoHand will now be on a 4' x 8' pallet for easier shipping!

HANDY ELEVATION SCALE. CAN ALSO BE USED FOR WELL DEPTH.

SURFACE WATER CHLORINATION

For best results; if using surface water, you should chlorinate your system every two weeks. Inject approximately ½ Gal. chlorine bleach per acre. Run system about 20 minutes then let set for ½ day before irrigating again.

Square feet per acre = 43,560 sq. ft.
 1 Acre = 208.71 ft. sq.
 1" an Acre = 6,500-13,500 Gallons (Drip irrigation depending on row spacing)
 1" an Acre = 27,154 Gallons (Overhead Irrigation)
 1" per hour an acre = 452.57 GPM (Overhead Irrigation)

2024/2025 Sales Finance Program

Low cash or no cash? Now is the perfect time to purchase supplies, with the best deals of the season with your **Multi-Use Account** by John Deere Financial. Put your purchasing power to work at Martin's Produce Supplies. We've got everything you need to keep your business moving forward.

Program	Program Period	Minimum Initial Purchase
No-Payments / No-Interest for 180 Days	JD Credit Dec 1 - Jan 5, 2024	\$500

Program Requirements

To take advantage of this great offer, you must have a Multi-Use Account. You can call 1-800-433-8964 to request a credit limit increase on your Multi-Use Account.

How to Apply

If you don't have an account, don't worry. John Deere Financial gives you easy ways to apply:

- Online at JohnDeereFinancial.com/MultiUseApply
- Call 1-800-433-8964 to have an application mailed to you

For more information, contact Martin's Supply at 717-532-5918.

*Offer valid on qualifying purchases made between September 1, 2024 to January 10, 2025 and is subject to approved credit on a Multi-Use Account, a service of John Deere Financial, f.s.b. For agricultural/commercial use only. After the promotional period, interest charges will begin to accrue at the regular Multi-Use Account rate. \$500 minimum purchase required. Available at participating merchants, see your local merchant for complete details.

January 14 & 15, 2026

at Spooky Nook

75 Champ Blvd. Manheim, PA

**Connect with new and returning vendors,
while exploring 36 seminars across 4 meeting rooms.**

**Topics include 9 seminars on cut flowers, 8 on greenhouses,
9 on produce, and 8 on other key industry areas.**

Look for future ads and direct mailings for more details.

**\$40 REGISTRATION (per person for both days)
